With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Yakov Amihud ("Optimal Consumption Policy under Uncertain Income") is Senior Lecturer at the Faculty of Management, Tel Aviv University, Tel Aviv, Israel and Associate Professor at the Graduate School of Business, New York University, New York, New York 10006. He has a B.A. from the Hebrew University and M.Sc. and Ph.D. degrees from New York University in Economics and Quantitative Analysis. His research interests are in the economics of uncertainty and finance, and has published extensively in these areas.

Ronald D. Armstrong ("Consensus Formation Allowing Incomplete Rankings") is an Associate Professor in the Department of Quantitative Business Analysis at the University of Georgia, Athens, Georgia 30602. His research interests include statistics, scheduling and menu planning with emphasis on computer implementations of mathematical programming algorithms. He has co-authored two books on data processing and is the author or co-author of over forty refereed publications. He is a member of TIMS, ORSA and other professional societies.

Vijay S. Bawa ("Stochastic Dominance: A Research Bibliography") is Professor, Department of Finance, University of Texas at Austin, Austin, Texas 78712 and Member of Technical Staff, Bell Laboratories, Murray Hill, New Jersey 07974. He received B.Tech. (Honors) in Mechanical Engineering from I.I.T., Bombay, and Ph.D. in Operations Research from Cornell University. He has published extensively in several journals. He is coauthor of *Estimation Risk and Optimal Portfolio Choice* published in 1979 by North-Holland. His current research interests include stochastic dominance, estimation risk, portfolio theory, capital market equilibrium analysis and investment management. He is a member of TIMS.

Suresh Chand ("A Perfect Planning Horizon Procedure for a Deterministic Cash Balance Problem") is an Assistant Professor of Management at the Krannert Graduate School of Management, Purdue University, West Lafayette, Indiana 47907. He received his B.Tech. and M.Tech. in Mechanical Engineering from the Indian Institute of Technology, an M.S. in Industrial Engineering from the University of Texas at Arlington, and a Ph.D. in Industrial Administration from Carnegie-Mellon University. His published work has appeared in *Operations Research*, *Decision Sciences*, and *Management Science*. He is a member of TIMS.

Wade D. Cook ("Consensus Formation Allowing Incomplete Rankings" and "On the Borda-Kendall Consensus Method for Priority Ranking Problems") is a Professor in the Faculty of Administrative Studies at York

University, Toronto, Ontario M3J 2R6, Canada. His research interests include consensus formation, project planning and selection and other areas of mathematical programming. He is the co-editor of one book and the author or co-author of over thirty five refereed publications. He is a member of TIMS, ORSA and other professional societies.

Giora Harpaz ("Learning, Experimentation, and the Optimal Output Decisions of a Competitive Firm") is Assistant Professor of Economics and Finance, Baruch College, The City University of New York, New York, NY 10010. He received a B.A. in Economics and Statistics (1973) and an M.B.A. (1975) from the Hebrew University and a D.B.A. in Finance from Indiana University (1979). His research interests are in Bayesian Statistics, Theory of the Firm under Uncertainty and Option Models. He is a member of TIMS.

Milton Harris ("Asymmetric Information, Incentives, and Intrafirm Resource Allocation") is Professor of Finance and Managerial Economics at the J. L. Kellogg Graduate School of Management, Northwestern University, Evanston, Illinois 60201. Prior to joining the Northwestern faculty in 1981, he was Associate Professor of Economics at the Graduate School of Industrial Administration, Carnegie-Mellon University. He holds a B.A. in mathematics from Rice University and A.M. and Ph.D. degrees in economics from the University of Chicago. His current research interests include economics of information, contracts, and agency theory, and he has published in *Econometrica*, *Journal of Economic Theory*, *American Economic Review* and elsewhere.

Moshe Ben-Horim ("Inflation and the Trade Credit Period") is Associate Professor of Finance, Graduate School of Business Administration, University of Florida, Gainesville, Florida 32611. He received his education in statistics, and B.A. and M.A. degrees in economics, from the Hebrew University of Jerusalem. He received his Ph.D. from the Graduate School of Business Administration at New York University. He has held research positions in statistics and finance at the National Bureau of Economic Research in New York, the Israeli Institute of Financial Research, the Hebrew University of Jerusalem, and a number of other institutions. He has also held teaching positions in statistics, decision-making, and finance at New York University, the University of Florida, the Hebrew University, and Montclair State College in New Jersey. He has written a number of articles in professional journals, and has served as a consultant to public utilities and government agencies in the United States and elsewhere.

J. G. Kallberg ("Short Term Financial Planning under Uncertainty") is an assistant pro-

fessor of finance at the Graduate School of Business, New York University, New York, New York 10006. He received his M.Sc. (Mathematics) from Simon Fraser University and his B.Sc. (Mathematics) and Ph.D. (Business Administration) from the University of British Columbia. His current research interests are utility theory, applications of mathematical programming to finance, and working capital management. He is an associate editor of finance for *Management Science* and is a member of TIMS.

Charles H. Kriebel ("Asymmetric Information, Incentives and Intrafirm Resource Allocation") is a Professor of Industrial Administration at the Graduate School of Industrial Administration, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213. He received his B.S. and M.A. degrees from the University of Pennsylvania, and his Ph.D. from M.I.T. where he was a Ford Foundation Fellow. His research in the areas of management science, computers and information systems, operations management and applied economics have been published in leading professional journals including *Econometrica*, *Management Science*, *Operations Research*, *Naval Research Logistics Quarterly*, *Behavioral Science*, *Communications of the ACM*, *I.A.G. Journal*, etc. He has been a National Lecturer of the Association for Computing Machinery and is a Fellow of the American Association for the Advancement of Science. He also serves as Departmental Editor for Information Systems and Accounting, *Management Science*; Associate Editor, *Naval Research Logistics Quarterly*; member, Editorial Board, *Information and Management* (I.A.G.); and as an advisor to the U.S. National Academy of Sciences. He is a member of TIMS.

Wayne Y. Lee ("Learning, Experimentation, and the Optimal Output Decisions of a Competitive Firm") is Associate Professor of Finance, Indiana University, Bloomington, Indiana 47405. His Ph.D. degree in Management is from the University of California at Los Angeles. He currently serves as a member of the editorial board of the *Journal of Business Research* and will soon serve on the editorial board of *Journal of Financial Research*. His papers have appeared in the *Journal of Financial and Quantitative Analysis*, *Journal of Economic Theory*, *Journal of Finance*, *Journal of Banking and Finance*, *Southern Economic Journal*, *Journal of Business Research* and the *Journal of Financial Economics*.

Haim Levy ("Inflation and the Trade Credit Period") is Professor of Finance, Graduate School of Business Administration, University of Florida, Gainesville, Florida 32611. He received B.A. and M.A. degrees in statistics and economics, and his Ph.D. from the Hebrew University of Jerusalem. He has taught statistics, finance, and decision-making at the Hebrew University, the University of Illinois, the University of California at Berkeley, the University of Florida, and the Wharton School at the University of Pennsylvania. He has written more than one hundred articles and books.

His articles have appeared in leading journals, including the *American Economic Review*, *Management Science*, *Econometrica*, the *Review of Economics and Statistics*, the *Journal of Finance*, and the *Journal of Financial and Quantitative Analysis*. He is also the editor of the journal *Research in Finance*. He has served as a consultant to numerous firms in the United States and Israel. His consulting work has focused mainly on the application of statistical tools and quantitative methods to economic and business problems faced by firms and governments.

Haim Mendelson ("Optimal Consumption Policy under Uncertain Income") is Assistant Professor at the Graduate School of Management, University of Rochester, Rochester, New York 14627. His articles have appeared in journals such as *Operations Research*, *Journal of the Association for Computing Machinery*, *Journal of Financial Economics*, *Journal of Applied Probability*, *Journal of Monetary Economics*, *European Journal of Operations Research*, *Communications of the ACM*, *Journal of Combinatorial Theory*. He is a member of TIMS, ORSA, ACM, ORSIS and the AEA.

Thomas E. Morton ("A Perfect Planning Horizon Procedure for a Deterministic Cash Balance Problem") is a Professor of Industrial Administration at Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213. He received a B.S. in Mathematics from California Institute of Technology, an M.S. in Mathematics, an M.B.A. in Business (Economics) and a Ph.D. in Business (Operations Research) all from the University of Chicago. Professor Morton's published work has appeared in numerous professional journals. He is a member of TIMS.

Artur Raviv ("Asymmetric Information, Incentives and Intrafirm Resource Allocation") is Professor of Finance at the Kellogg Graduate School of Management, Northwestern University, Evanston, Illinois 60201. He received a B.A. in Economics and Statistics and a B.S. in Mathematics from the Hebrew University in Jerusalem, Israel. He received a M.S. in Operations Research from the Israel Institute of Technology and a Ph.D. in Managerial Economics from Northwestern University. He has been on the faculty of the Graduate School of Industrial Administration, Carnegie-Mellon University and the Graduate School of Management, Tel-Aviv University, Israel. His research articles have appeared in several journals including *Management Science*, *American Economic Review*, *Econometrica*, and the *Journal of Finance*.

Lawrence M. Seiford ("On the Borda-Kendall Consensus Method for Priority Ranking Problems" and "Consensus Formation Allowing Incomplete Rankings") is an Assistant Professor in the Department of General Business, The University of Texas at Austin, Austin, Texas 78712. His publications appear in several journals including *Management Science*, *Journal of the Operational Research Society* and *International Journal of Game Theory*. His research interests include the areas of

mathematical programming, game theory and decision support systems. He is a member of TIMS, ORSA and a number of other professional groups.

Robert W. White ("Short Term Financial Planning under Uncertainty") is Associate Professor of Finance at The University of Western Ontario, London, Canada. He received his B.Sc. (Honours Physics) and MBA from The University of British Columbia and his Ph.D. from MIT. He has published in the *Journal of Financial and Quantitative Analysis* and *Journal of Money Credit and Banking*. His current research interests involve capital market tests and the management of financial institutions.

Robert L. Winkler ("Learning, Experimentation, and the Optimal Output Decisions of a Competitive Firm") is Distinguished Professor of Quantitative Business Analysis in the Graduate School of Business, Indiana University, Bloomington, Indiana 47401. For the 1980–1981 academic year he was a Visiting Professor at INSEAD, Fontainebleau, France. He received a B.S. from the University of Illinois and a Ph.D. from the University of Chicago, and he has held visiting positions at the Uni-

versity of Washington, the International Institute for Applied Systems Analysis, and Stanford University. He is the author of two books and numerous journal articles. His primary research interests involve probability forecasting, Bayesian inference, and statistical decision theory. He is a member of TIMS.

William T. Ziemba ("Short Term Financial Planning under Uncertainty") is Professor of Management Science in the Faculty of Commerce, University of British Columbia, Vancouver, British Columbia V6T 1W5, Canada. During the 1981/82 academic year he is Visiting Professor of Finance and Management Science at the Graduate School of Management, University of California, Los Angeles, California 90024. His current research is in the areas of stochastic and mathematical programming, energy policy modeling, quantitative finance and gambling models. He holds a B.S.Ch.E. degree from the University of Massachusetts and M.B.A. and Ph.D. degrees from the University of California, Berkeley. He is a member of TIMS, ORSA and CORS and is the CORS editor of *INFOR* and an associate editor of *Management Science*.
