With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Mary J. Culnan ("The Intellectual Development of Management Information Systems, 1972-1982: A Co-Citation Analysis") is an Associate Professor of Management at the Kogod College of Business Administration, American University, Washington, D.C. 20016. Her research interests include organizational and social impacts of computing and scholarly communication. She earned a Ph.D. in Management from UCLA. She is a member of TIMS, Academy of Management, Association for Computing Machinery and American Association for Public Opinion Research. She currently serves as Vice-Chairperson of TIMS College on Information Systems and as an Associate Editor of *MIS Quarterly*.

Magbool Dada ("An LP Planning Mode for a Mental Health Community Support System") is Assistant Professor in the Department of Information and Decision Sciences at the University of Illinois, Chicago. He received a Ph.D. in Management from MIT and a B.S. in Industrial Engineering and Operations Research from the University of California at Berkeley. His research interests include inventory/distribution systems and production planning systems.

Gregory W. Diehl ("A Variable Buffer-Size Model and Its Use in Analyzing Closed Queueing Networks with Blocking") is currently Technical Manager for Network Dynamics Inc. He has worked for Bell Labs, Digital and BGS Systems in performance analysis of Computer-Communication and Manufacturing Systems. He completed his Ph.D. at Harvard University in Engineering Science and A.B. in Chemistry and Math at Oberlin College.

Stephen C. Graves ("An LP Planning Model for a Mental Health Community Support System") is Associate Professor of Management Science at the Alfred P. Sloan School of Management, Massachusetts Institute of Technology. He received an A.B. and M.B.A. from Dartmouth College, and a Ph.D. from the University of Rochester. He has published several articles in the area of production and operations management. His current research interests include inventory management, production planning, and scheduling. He is a member of TIMS and ORSA.

Morris Hamburg ("A Homogeneous Industry Model of Resource Allocation to Basic Research and Its Policy Implications") is Professor of Statistics and Operations Research, The Wharton School, University of Pennsylvania, Philadelphia, Pennsylvania 19104. His publications include numerous articles in professional journals, research monographs and books, such as *Statistical Analysis for Decision Making*. He has been the director of research studies and has served as a consultant to corporations and as an expert witness of law

firms and government agencies. He is currently working on models for forecasting, planning, and decision making. He is a member of the American Statistical Association, International Statistical Institute, American Economic Association and TIMS.

Prafulla Joglekar ("A Homogeneous Industry Model of Resource Allocation to Basic Research and Its Policy Implications") is Professor of Management and Director of the Applied Research Center at La Salle University, Philadelphia, Pennsylvania 19141. Professor Joglekar has developed and taught a wide variety of undergraduate and graduate courses at La Salle. Management Science and Production/Operations Management are the primary areas of his expertise. Applying traditional production management concepts to service industries and nonprofit organizations has been a major focus of his research and teaching in recent years. Professor Joglekar is a consultant to several corporations, foundations and nonprofit agencies in the Philadelphia area. He holds a B.S. (Math) degree from Nagpur University, India, an M.B.A. from the Indian Institute of Management, Ahmedabad, India (Harvard Affiliate), and an M.S. and a Ph.D. (Operations Research) from the University of Pennsylvania. His academic performance earned him several medals, scholarships and assistantships. Dr. Joglekar's papers have appeared in a variety of journals including *Management Science*, *Public Choice*, and *Evaluation and the Health Professions*. He is a member of TIMS, APICS, AIDS and American Management Associations (AMA). He also serves on the Board of Directors of the Nonprofit Management Association (NMA). Dr. Joglekar has been a referee for several journals and serves on the editorial board of *Evaluation and the Health Professions*.

Shlomo Kalish ("A Market Entry Timing Model for New Technologies") is Assistant Professor of Management at the University of Rochester, Rochester, NY 14627, and Lecturer at Tel Aviv University, Tel Aviv, Israel. He has a B.S. in Mathematics from Tel Aviv University, a M.Sc. in Management and a Ph.D. in Operations Research both from Massachusetts Institute of Technology. He has published articles in the areas of new product marketing, pricing, advertising, and positioning. He is on the editorial board of *Marketing Science*. He is a member of TIMS, AMA, and AEA.

Gary L. Lilien ("A Market Entry Timing Model for New Technologies") is Research Professor of Management Science at the Pennsylvania State University, University Park, Pennsylvania 16802. He has a B.S., M.Sc. and DES, all in Operations Research from Columbia University. He is author or co-author of

several books and numerous articles primarily on marketing models, new products, and industrial marketing. He is Research Director of Penn State's Institute for the Study of Business Markets, and is Editor-in-Chief of *Interfaces*. He is a member of TIMS and ORSA.

Wesley A. Magat ("When Does Lag Structure Really Matter in Optimizing Advertising Expenditures?") is Associate Professor in the Fuqua School of Business at Duke University, Durham, North Carolina 27706. He received his A.B. degree in Economics and Mathematics at Brown University and his M.S. and Ph.D. degrees in Managerial Economics and Decision Sciences at Northwestern University. He has published articles in professional journals such as *Bell Journal of Economics*, *American Economic Review*, *Journal of Law and Economics*, and *Duke Law Journal*. His research interests include consumer decision making, regulatory information programs, and the regulatory process.

Edwin Mansfield ("Patents and Innovation: An Empirical Study") is Director of the Center for Economics and Technology and Professor of Economics at the University of Pennsylvania, Philadelphia, Pennsylvania 19104. Author of 21 books and over 150 articles, he has been elected a fellow of the American Academy of Arts and Sciences, a fellow of the Econometric Society, and a fellow of the Center for Advanced Study in the Behavioral Sciences. He recently received the Publication Award of the Patent Law Association for the best publication on the patent system.

John M. McCann ("When Does Lag Structure Really Matter in Optimizing Advertising Expenditures?") is Associate Professor in the Fuqua School of Business at Duke University, Durham, North Carolina 27706. He received his B.S. in Mechanical Engineering and M.B.A. degrees from the University of Kentucky and his Ph.D. from Purdue University. He has published articles in professional jour-

nals such as *Management Science*, *Marketing Science*, *Journal of Marketing Research*, *Naval Research Logistics Quarterly*, and *Organizational Behavior and Human Performance*. His research interests are in the application of expert systems and statistical models to marketing problems.

Richard C. Morey ("When Does Lag Structure Really Matter in Optimizing Advertising Expenditures?") is Professor and Director of the Center for Applied Business Research at Duke University's Fuqua School of Business, Durham, North Carolina 27706. He received his Ph.D. from the University of California at Berkeley. His prior associations have included Institute for Defense Analyses, Stanford Research Institute and Control Analysis Corporation, a consulting firm in Palo Alto, California of which he was a cofounder and president. He has also taught at Stanford University and George Washington University in Operations Research. His research interests are in the areas of inventory control, productivity and efficiency analysis and manpower allocation. He has published in *Operations Research*, *Management Science*, *Naval Research Logistics Quarterly*, *Omega*, *Decision Sciences*, *Inquiry*, etc. He is an Associate Editor for *Naval Research Logistics Quarterly*.

Rajan Suri ("A Variable Buffer-Size Model and Its Use in Analyzing Closed Queueing Network with Blocking") is currently Associate Professor of Industrial Engineering at the University of Wisconsin-Madison. He received his Bachelors degree from Cambridge University (England) and his M.S. and Ph.D. from Harvard University. His current interests are in modelling and decision-support for manufacturing systems, specializing in Flexible Manufacturing Systems. He is the author of many journal publications and several books, and also consultant to major industrial corporations on this subject.
