With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Uttarayan Bagchi ("Minimizing Mean Squared Deviation of Completion Times About a Common Due Date") is Associate Professor of Management at the University of Texas at Austin. He received his B.Sc. and M.Sc. degrees in Chemistry from Indian Institute of Technology, Kharagpur and Ph.D. degree in Business Administration from The Pennsylvania State University. His research and teaching areas of expertise include operations management, inventory management, and scheduling. Dr. Bagchi has published articles in *Operations Research*, *Naval Research Logistics Quarterly*, *Decision Sciences*, *Journal of the Operational Research Society*, and *Operations Research Letters*. He is a member of The Institute of Management Sciences and Decision Sciences Institute. Dr. Bagchi serves as an Association Editor of *Decision Sciences*.

Yih-Long Chang ("Minimizing Mean Squared Deviation of Completion Times About a Common Due Date") is Assistant Professor in the Faculty of Management Sciences, Ohio State University, Columbus, Ohio 43210. He received a Ph.D. from the University of Texas, Austin, Texas 78712. Dr. Chang's research interests center on flexible manufacturing systems and management of information systems.

Zvi Drezner ("A Heuristic Procedure for the Layout of a Large Number of Facilities") is Chairman of the Management Science Department, California State University, Fullerton. He received his B.Sc. in Mathematics and Ph.D. in Computer Science from the Technion, Haifa, Israel. His main research field is in location theory and optimization. He has published close to 50 papers in journals like *Management Science*, *Operations Research*, *IIE Transactions*, *Naval Research Logistics Quarterly*, and others.

Jorge M. Huacuz ("An Integer Programming Approach and Implementation for an Electric Utility Capacity Planning Problem with Renewable Energy Sources") is Head of the Solar Energy Research Group at the Electrical Research Institute of Mexico. He received a B.Sc. in Chemical Engineering from the National Autonomous University (UNAM) in Mexico City, and earned both M.S. and Ph.D. degrees in Engineering Physics at the University of California, San Diego. He is currently doing applied research on the use of solar energy to save fuel-generated electricity. He is a member of The International Solar Energy Society (ISES) and is currently Vice President of ANES, the Mexican Section of ISES.

Darwin Dee Klingman ("An Optimization Based Integrated Short-Term Refined Petroleum Product Planning System") is Professor of Management Science and Information Systems in the College of Business Administration and Professor of Computer Sciences in the College of Natural Sciences, first recipient of the Hugh Roy Cullen Centennial Chair in Business Administration, Director of the Information Systems Management Program and Director of the Center for Business Decision Analysis. He is the recipient of numerous national and international research awards, and has published over 180 research articles in the areas of network flow analysis, telecommunications, expert systems, decision support systems, artificial intelligence, integrated business planning, and computer implementation of optimization algorithms. Professor Klingman holds an Interdisciplinary Ph.D. in Business Administration, Computer Sciences, and Mathematics from The University of Texas at Austin (1969).

Ramayya Krishnan ("An Optimization Based Integrated Short-Term Refined Petroleum Product Planning System") is a PhD candidate in the Management Science and Information Systems Department at the University of Texas at Austin. He will be joining the faculty at the School of Urban and Public Affairs at Carnegie-Mellon University. His research interests are in the use of artificial intelligence for decision support, logic programming and model management. He received a B.Tech in Mechanical Engineering at the Indian Institute of Technology, Madras and an M.S. in Operations Research at the University of Texas at Austin. He is a member of ACM, TIMS and ORSA.

John Mamer ("Discounted and Per Unit Costs of Product Warranty") is Assistant Professor in Management Science at the Graduate School of Management, UCLA, Los Angeles, CA 90024. He received B.S. (Mathematics) and B.A. (Economics) degrees from the University of California at Davis and M.S. and Ph.D. (Management Science) degrees from the School of Business Administration, University of California, Berkeley. His current interests include stochastic models of inventory and manufacturing, applications of random graphs, and game theory. He is a member of ORSA and TIMS.

Rema Padman ("An Optimization Based Integrated Short-Term Refined Petroleum Product Planning System") is Assistant Professor in the Management Sciences Department at the University of Minnesota. She received her

B.Tech. from the Indian Institute of Technology, Kanpur, India and PhD in Operations Research from the University of Texas at Austin. Her primary areas of research interest are design, analysis and implementation of parallel graph algorithms and optimization-based decision support systems. She is a member of ORSA, TIMS and ACM.

Nancy Valree Phillips ("An Optimization Based Integration Short-Term Refined Petroleum Product Planning System") is Associate Professor of Management Science and Assistant Director of the Center for Business Decision Analysis in the College of Business Administration, The University of Texas, Austin, Texas 78712. She holds a Master's degree in Mathematical Sciences and a Doctorate in Management Sciences from Clemson University. Her research in optimization-based decision support systems and network optimization has appeared in leading OR/MS journals. She is a member of The Institute of Management Sciences.

Behnam Pourbabai ("Approximation of the Overflow Process from a $G/M/N/K$ Queueing System") is Assistant Professor of Operations Research at the Graduate School of Business Administration, New York University, New York, New York 10006. He received his B.S. in Civil Engineering and M.S. in Industrial and Operations Engineering, both from the University of Michigan, Ann Arbor, and his Ph.D. in Industrial Engineering and Operations Research at the University of Massachusetts, Amherst. His research interests are in applied probability, performance modeling, and manufacturing systems. He is a member of TIMS, ORSA, ACM, SIAM, IEEE, ASME, DSI, IIE, Alpha Pi Mu and Tau Beta Pi.

Ravi Ramamurti ("Performance Evaluation of State-Owned Enterprises in Theory and Practice") is Visiting Assistant of Professor of Business Administration at Harvard Business School, on leave from Northeastern University. At Harvard, he is affiliated with the Business, Government, and Competition Area. He obtained his MBA from the Indian Institute of Management in 1974 and worked in industry and government before obtaining his DBA from Harvard University in 1982. He is the author of *State-Owned Enterprises in High Technology Industries* and has published recently in *California Management Review*, *Journal of Management Case Studies*, *Long Range Planning*, and *The Developing Economies*.

Hanif D. Sherali ("An Integer Programming Approach and Implementation for an Electric Utility Capacity Planning Problem with Renewable Energy Sources") is Professor at the Department of Industrial Engineering and Operations Research, Virginia Polytechnic Institute and State University, Blacksburg, Vir-

ginia 24061. He received his B.S. in Electrical Engineering from Bombay University, India, and his M.S. and Ph.D. in Operations Research from Georgia Institute of Technology. His research interests are in mathematical programming including discrete and continuous nonconvex programming problems, and in energy and economic mathematical modelling and analysis. He has co-authored a book on disjunctive programming and has published in several journals including *Operations Research*, *Mathematical Programming*, *Journal of Optimization Theory and Applications*, and *Management Science*. He is a member of ORSA, IIE and Mathematical Programming Society.

Konstantin Staschus ("An Integer Programming Approach and Implementation for an Electric Utility Capacity Planning Problem with Renewable Energy Sources") works in the Management Sciences Department of Pacific Gas and Electric Company, San Francisco, California. He received his B.S. degree from The Technical University Berlin (FRG), and his M.S. and Ph.D. in Operations Research from Virginia Polytechnic Institute and State University. His current research interests are in electric utility reliability planning, and hydro energy and capacity expansion modelling. He is a member of ORSA, IEEE and AGU.

David M. Steiger ("An Optimization Based Integrated Short-Term Refined Petroleum Product Planning System") is President, D.S.I. Consultants, P.O. Box 461, Tulsa, Oklahoma 74170. He received a B.S. in Electrical Engineering and an M.B.A. from the University of Texas at Austin. His current interests include opportunity definition and problem solving in the areas of strategic planning, working capital control and operational evaluation.

Robert S. Sullivan ("Minimizing Mean Squared Deviation of Completion Times About a Common Due Date") is Joe B. Cook Professor of Management and Associate Dean for Academic Affairs and Research at the Graduate School of Business of the University of Texas, Austin, Texas 78712. He earned a B.A. degree (Mathematics) from Boston College, an M.B.A. degree from Cornell University, and a Ph.D. degree from the Pennsylvania State University. His primary teaching and research interests are in operations management with particular emphasis on computer integrated manufacturing and manufacturing information systems. He is the coauthor of *Service Operations Management*, McGraw-Hill Series in Quantitative Methods. He has published in journals such as *Management Science*, *Operations Research*, *Naval Research Logistics Quarterly*, and *Socio-Economic Planning Sciences*. Professor Sullivan is an Associate Editor of *Journal of Manufacturing and Operations Management*.
