With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Steve H. Barr ("Decision Support System Effectiveness: A Review and an Empirical Test") is Assistant Professor of Management at Oklahoma State University, Stillwater, Oklahoma 74078. He received his B.B.A. and M.S. degrees from Texas Tech University and Ph.D. in Management from the University of Iowa. His articles have appeared in *Psychological Bulletin*, *Personnel Psychology*, *Journal of Business Research*, and others. His current research interests include determinants of persistence in work groups, design of feedback systems, and managerial selection decisions. He is a member of Academy of Management, APA, and DSI.

Daniel Bienstock ("Optimizing Resource Acquisition Decisions by Stochastic Programming") received his Ph.D. (Operations Research) from MIT (1985) and B.A. (Mathematics) from Brandeis University (1982). He is currently a Member of Technical Staff at Bell Communications Research, Morristown, New Jersey, conducting research in combinatorics and optimization. Dr. Bienstock received the 1985-1986 Zannetos thesis prize (Sloan School of Management, MIT). To date, he has over 10 publications in discrete mathematics topics.

James S. Dyer ("The Reliability of Subjective Probabilities Obtained Through Decomposition") is the Foster Parker Centennial Professor of Management and Finance at the College of Business Administration, University of Texas at Austin. He received his B.A. and Ph.D. degrees from the University of Texas, and was a member of the faculty of the Graduate School of Management at the University of California, Los Angeles prior to returning to Texas. His publications have focused on the use of decision analysis as an aid to risky decision making. He is currently an Associate Editor of *Management Science*, and is the Vice President of Publications for TIMS.

Yuji Ijiri ("Momentum Accounting and Managerial Goals on Impulses") is Robert M. Trueblood Professor of Accounting and Economics at Carnegie-Mellon University's Graduate School of Industrial Administration where he received his doctorate and has been a faculty member since 1967. A past president of the American Accounting Association, he has contributed numerous books and articles in accounting. In addition, he served as an abstract writer for the mathematical logic section of *Zentralblatt für Mathematik* for many years and has published a number of articles in such journals as *Management Science*, *Journal of*

American Statistical Association, *Econometrica*, *American Economic Review*, *Journal of Political Economy*, and *Proceedings of National Academy of Sciences*.

Richard Jensen ("Information Cost and Innovation Adoption Policies") is currently an Associate Professor of Economics at the University of Kentucky. He received a Ph.D. in Economics from Northwestern University in 1980, and has published articles on innovation adoption and diffusion, technology transfer and trade, tariff policy, and economic history in a variety of journals.

Roger V. Johnson ("Balancing Large Assembly Lines with FABLE") joined the Production and Operations Management faculty at The University of Michigan Business School, Ann Arbor, MI 48109, in 1986, in part to locate close to Detroit's assembly lines. His research, consulting, and software interests include assembly line balancing and management, project management, branch-and-bound methods, and facility layout, particularly of large office buildings. Dr. Johnson earned his doctorate at UCLA, before returning to the University of Otago in his home town of Dunedin in New Zealand, for a stint which included four years as Dean of the Faculty of Commerce. He then returned to UCLA for four years as Visiting Associate Professor. Dr. Johnson has two previous articles in *Management Science*, has published in *Decision Sciences* and *International Journal of Production Research*, and is a member of TIMS, DSI, and the New Zealand OR Society.

Don N. Kleinmuntz ("The Reliability of Subjective Probabilities Obtained Through Decomposition") is Assistant Professor of Behavioral and Policy Sciences at the Sloan School of Management, Massachusetts Institute of Technology, Cambridge, MA 02139. Prior to joining the faculty at MIT, he was a member of the faculty of the Graduate School of Business at the University of Texas at Austin. He received a B.A. in Statistics, an M.B.A., and a Ph.D. in Business Administration (specializing in Decision Research), all from the University of Chicago. His research interests focus on cognitive processes in decision making, including issues related to the effectiveness and efficiency of decision aiding techniques based on quantitative decision analysis, and human information processing considerations in the design and implementation of computer-based decision support. He has published articles in *Behavioral Science*, *Management Science*, *Organizational Behavior and*

Human Decision Processes, and *Psychological Review*. He is currently a member of TIMS, ORSA, American Psychological Association, and Society for Judgment and Decision Making.

George F. Loewenstein ("Frames of Mind in Intertemporal Choice") is Assistant Professor of Behavioral Science at the University of Chicago, Graduate School of Business. He holds a Ph.D. in Economics from Yale University. His current research interests include intertemporal choice, preference modeling, risk perception and social judgment.

James C. McDonnell ("Decision Support System Effectiveness: A Review and an Empirical Test") is a Senior Systems Analyst in the Management Information Consulting Division of Arthur Andersen and Company, New York, New York 10105. He received his B.S. degree from Cornell University and an M.B.A. from Oklahoma State University. His interests are in design and implementation of information systems. He is a member of American Association of Petroleum Geologists.

H. V. Ravinder ("The Reliability of Subjective Probabilities Obtained Through Decomposition") is Assistant Professor of Management Science at the Anderson Graduate School of Management, University of New Mexico, Albuquerque. He received his Master's degree in Industrial Engineering from the Indian Institute of Technology, Madras, and the Ph.D. from Department of Management, University of Texas at Austin. His current research and teaching interests are in the areas of subjective probability, multiattribute utility theory and production and operations management.

John Roberts ("Modeling Multiattribute Utility, Risk, and Belief Dynamics for New Consumer Durable Brand Choice") is an Associate Professor at the Australian Graduate School of Management, University of New South Wales. He holds an S.M. and Ph.D. from MIT, as well as a BA(Hons) and M.Comm. from the University of Melbourne. Prior to entering academia he had 15 years work experience, first as a senior research officer in the Australian Bureau of Statistics and then as the Australian Telephone Company's New South Wales Marketing Manager. Dr. Roberts' research has won a number of prizes including the American Marketing Association's Doctoral Dissertation Award and the Marketing Science Institute's award for re-

search proposals into consumer durables. He is on the editorial board of *International Journal of Research in Marketing*.

Jeremy F. Shapiro ("Optimizing Resource Acquisition Decisions by Stochastic Programming") is Professor of Operations Research and Management in the Sloan School of Management at MIT. He is currently on leave at Resource Management Systems, a Cambridge consulting company specializing in the development of business planning systems based on operations research models.

Ramesh Sharda ("Decision Support System Effectiveness: A Review and an Empirical Test") is Associate Professor of Management Science in the College of Business Administration at Oklahoma State University, Stillwater, Oklahoma 74078. He received a B.Eng. from the University of Udaipur (India), an M.S. from the Ohio State University, and an M.B.A. and Ph.D. from the University of Wisconsin-Madison. His papers have appeared in *Management Science*, *Interfaces*, *Computers and Operations Research*, *Annals of Operations Research*, *Management Science and Policy Analysis*, *Environment and Planning A*, *Simulation and Games*, and other journals. His research interests are in financial applications of management science models, DSS, integration of microcomputers in OR/MS, and policy analysis. He is a member of ORSA, TIMS, DSI, and ABSEL.

Glen Urban ("Modeling Multiattribute Utility, Risk, and Belief Dynamics for New Consumer Durable Brand Choice") joined the MIT faculty in 1966 after completing a Ph.D. from Northwestern University and B.S.M.E. and M.B.A. from the University of Wisconsin. He has taught and conducted research in the application of management science methods to new product design and marketing problems. He is co-author of four books including *Management Science in Marketing* (1968) and *Design and Marketing New Products* (1980). His works are published in journals including *Operations Research*, *Management Science*, *Journal of Marketing Research*, and *Marketing Science*. His papers have won awards including in 1983 the O'Dell award for the best paper published in *Journal of Marketing Research* (with Alvin Silk). He is on the editorial board of *Marketing Science*. He is currently completing a book on marketing strategy called *Advanced Marketing: strategic Analysis and Decisions* (with Steven Star).
