With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Raphael Amit ("Efficient Corporate Diversification: Methods and Implications") holds a Ph.D. in Managerial Economics from Northwestern University. He is Associate Professor of Management at the J. L. Kellogg Graduate School of Management, Northwestern University. He has been the recipient of the Richard M. Paget Research Chair in Business Policy and the J. L. Kellogg Research Professorship. His research is published in *Academy of Management Journal*, *Contemporary Accounting Research*, *Journal of Accounting Auditing and Finance*, *Journal of Management*, *Operations Research*, *Strategic Management Journal* and others. His current research interests include theoretical and empirical studies in business and corporate strategy formulation, as well as studies on the link between strategy and organizational structures of firms.

Gabriel R. Bitran ("Approximations for Product Departures from a Single-Server Station with Batch Processing in Multi-Product Queues") is Professor of Management Science at the Alfred P. Sloan School of Management, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139. He received a B.S. in Industrial Engineering and M.Sc. in Engineering from the University of Sao Paulo in Brazil, and an M.Sc. and Ph.D. in Operations Research from MIT. His current research interests are in Operations Management and Operations Research. He is a member of TIMS and ORSA.

Raymond A. Jacobs ("Reducing Inventory System Costs by Using Robust Demand Estimators") is Assistant Professor of Management in the College of Business and Economics at Radford University in Radford, Virginia. He received his M.S. in Operations Research and Systems Analysis and his Ph.D. in Business Administration from the University of North Carolina at Chapel Hill. His current research interests involve operations management planning and control systems. His research on estimating demand parameters also has been published in *Decision Sciences*. He is a member of TIMS, ORSA, APICS, and DSI.

Mark Grinblatt ("Adverse Risk Incentives and the Design of Performance-Based Contracts") is currently a Visiting Associate Professor of Finance at the Wharton School. He is also an Associate Professor of Finance at UCLA's Anderson Graduate School of Management, where he has served on the faculty since 1981 after graduating from Yale University. His research interests include asset pricing, options, stock splits, performance evaluation, and asymmetric information. He has published in a number of

journals, including *Quarterly Journal of Economics*, *Journal of Finance*, *Journal of Business*, *Journal of Financial Economics* and *Journal of Financial and Quantitative Analysis*.

Faruk Güder ("Computing Equilibrium Single Commodity Trade Flows Using Successive Approximation") is Assistant Professor of Management Science at the School of Business, Loyola University of Chicago. He received his B.A. in Business Administration from Ege University, Turkey and his M.B.A. and Ph.D. degrees in Quantitative Analysis from the School of Business, University of Wisconsin-Madison. His research interests include spatial equilibrium problems and distribution design problems in a price responsive environment. He is a member of ORSA and TIMS.

Sunil Gupta ("Modeling Integrative, Multiple Issue Bargaining") is Associate Professor of Marketing at the Graduate School of Business, Columbia University, New York, New York 10027. He received a Masters degree in Management Studies from the Birla Institute of Technology and Science in Pilani, India, and a Ph.D. in Marketing from the University of California at Berkeley. His research interests include bargaining, cooperative game theory, multiple person decision making and combining forecasts. He has contributed articles in these areas to *Management Science* and *Journal of Business and Economic Statistics*.

Joshua Livnat ("Efficient Corporate Diversification: Methods and Implications") holds a Ph.D. in Accounting from New York University. He is an Associate Professor of Accounting at New York University. His publications appear in *Academy of Management Journal*, *Contemporary Accounting Research*, *Journal of Accounting Auditing and Finance*, *Journal of Management*, *Strategic Management Journal* and others. His current research interests include the influence of accounting methods on stock prices and the interaction between accounting, finance and business policy formulation.

James Morris ("Computing Equilibrium Single Commodity Trade Flows Using Successive Approximations") is Professor of Business at the University of Wisconsin-Madison. He holds B.B.A. and M.B.A. degrees from the University of New Mexico and a Ph.D. degree in Operations Research from the University of Wisconsin-Madison. He is an Associate Editor of *IIE Transactions* and *Naval Research Logistics*. His current research interests include spatial equilibrium problems and facility location. He is co-author (with Robert Love and George Wesolowsky) of *Facilities Location: Models and Methods*, North-Holland, 1988.

Mark Schroder ("A Reduction Method Applicable to Compound Option Formulas") received his M.B.A. in Finance from the University of Chicago and his M.Sc. in Economic Theory from the London School of Economics and Political Science. He is currently a Senior Research Analyst with Kidder, Peabody & Co. Inc. The paper was written while the author was a Research Associate with Prudential Bache Securities.

Leroy B. Schwarz ("A Model for Assessing the Value of Warehouse Risk-Pooling: Risk-Pooling over Outside-Supplier Leadtimes") is Professor of Management at the Krannert Graduate School of Management, Purdue University, West Lafayette, IN 47907. He received his BA in Chemistry, and his MBA and PhD in Business from the University of Chicago. He has served on the faculties of the Amos Tuck School, Dartmouth College and the University of Rochester's Graduate School of Management. His research interests are in the areas of multi-level distribution/inventory systems, automatic warehousing systems, manufacturing decision support systems, and the mathematical modeling of strategic decisions with respect to manufacturing, inventory, and distribution. He is a member of TIMS, ORSA, APICS (CFPIM), and AIIE. He is an Associate Editor of *Management Science* and an Ameritech Foundation Fellow. Recently Professor Schwarz was appointed Academic Director of Purdue University's Center for the Management of Manufacturing Enterprises.

Devanath Tirupati ("Approximations for Product Departures from a Single-Server Station with Batch Processing in Multi-Product Queues") is Associate Professor in the Department of Management at the University of Texas at Austin. He received a B.Tech degree from the Indian Institute of Technology, a PGDM from the Indian Institute of Management, and a Ph.D.

from Massachusetts Institute of Technology. His current research interests include queueing networks, capacity planning and scheduling in manufacturing systems. He is a member of TIMS and ORSA.

Sheridan Titman ("Adverse Risk Incentives and the Design of Performance-Based Contracts") is currently on leave at the Department of the Treasury from UCLA's Anderson Graduate School of Management where he has been a faculty member since 1980. His research interests include Accounting, Corporate Finance, Portfolio Theory, and Real Estate. He has published research in these areas in a number of journals, including *American Economic Review*, *Journal of Accounting and Economics*, *Journal of Accounting Research*, *Journal of Finance*, *Journal of Business*, and *Journal of Financial and Quantitative Analysis*.

Harvey M. Wagner ("Reducing Inventory System Costs by Using Robust Demand Estimators") is Professor of Business Administration and Operations Research at the University of North Carolina at Chapel Hill. His initial research undertaken at the RAND Corporation on estimation issues in inventory theory was published in *Statistical Management of Inventory Systems*, John Wiley, 1962. Since then he has collaborated with colleagues and doctoral students on numerous papers on this topic. His research has been supported by the National Science Foundation, Office of Naval Research, and the Army Research Office. Professor Wagner was President of The Institute of Management Sciences in 1973. His book, *Principles of Operations Research*, Prentice Hall, won the Lancaster Prize in 1969, and he shared the Edelman Management Science Achievement Award in 1984. The Katholieke Universiteit of Leuven conferred a Doctor Honoris Causa in 1980. Since 1960, Professor Wagner has served as a consultant to the firm of McKinsey & Company.
