With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Kalyan Chatterjee (Special Editor, *Focussed Issue on Group Decision and Negotiation*) is Professor of Management Science and Director, Center for Research in Conflict and Negotiation at The Pennsylvania State University. He has a B.Sc. in Physics from Calcutta, a Post-Graduate Diploma in Management from the Indian Institute of Management, and a D.B.A. from Harvard. He has published extensively in models of bargaining and auctions in *Operations Research*, *Review of Economic Studies*, *International Journal of Game Theory*, and other journals.

Peter C. Cramton ("Dynamic Bargaining with Transaction Costs") is Associate Professor of Economics and Management at the Yale School of Management. He received a B.S. from Cornell University in 1980 and a Ph.D. from Stanford University in 1984. His recent research has addressed incentive questions in bargaining: How can we explain costly delays in negotiations among seemingly rational bargainers? How does the distribution of ownership influence incentives in bargaining? His work has appeared in *Econometrica*, *Review of Economic Studies*, *International Economic Review*, and other economics journals.

Alan R. Dennis ("Information Technology for Negotiating Groups: Generating Options for Mutual Gain") is Assistant Professor of Management Information Systems in the Terry College of Business at the University of Georgia. He received a Bachelor of Computer Science from Acadia University (Nova Scotia), an M.B.A. from Queen's University (Ontario), and a Ph.D. in Management Information Systems from the University of Arizona. Prior to entering the Arizona doctoral program, he spent three years on the faculty of the Queen's School of Business, and was a winner of the AACSB National Doctoral Fellowship. He has published articles in a variety of journals, including *Communications of the ACM*, *Academy of Management Journal*, *MIS Quarterly*, *Journal of MIS*, *Small Group Research*, and *IEEE Transactions on Systems, Man, and Cybernetics*. His current research interests include electronic meeting systems, systems analysis and design, and business process re-engineering.

Sirkka L. Jarvenpaa ("Computer Support of Groups: Theory-Based Models for GDSS Research") is Associate Professor of Information Systems at the University of Texas at Austin. She received her Ph.D. in Management Information Systems from the University of Minnesota in 1986. Dr. Jarvenpaa has published articles in such journals as *MIS Quarterly*, *Information Systems Research*, *International Journal of Man-Machine Studies*, and the *IEEE Trans-*

actions on Systems, Man, and Cybernetics. Her research interests include behavioral and organizational aspects of information technology. In her most recent research program, she examines the information technology management in global companies.

Gregory E. Kersten ("Restructurable Representations of Negotiation") and Special Editor, *Focussed Issue on Group Decision and Negotiation*) is Associate Professor at the Carleton University School of Business. He received his Ph.D. in Economic Science/Management Science from the Warsaw School of Economics, Poland. He is a vice-chairperson of the TIMS College on Group Decision and Negotiation. His research interests include problem representation and modeling, decision analysis and support, and negotiations and group decision making. He has published over 50 articles in refereed journals.

Zbig Koperczak ("Restructurable Representations of Negotiation") received his B.Sc. in Electrical Engineering and his M.Sc. in Computer Science from Wroclaw Technical University, Poland. He is a system programmer and research assistant at the University of Ottawa. His interests include knowledge representation, machine learning, and the application of artificial intelligence concepts to social sciences. He is completing his M.B.A. at the University of Ottawa. He is a coauthor of 12 research papers.

Wojtek Michalowski ("Restructurable Representations of Negotiation") is Associate Professor at the Carleton University School of Business, and is Director of Decision Analysis Laboratory. He received his Ph.D. in Economic Science/Management Science from the Warsaw School of Economics, Poland. His research interests focus on decision analysis and decision support. He has published over 40 articles in refereed journals.

Jeryl L. Mumpower ("The Judgment Policies of Negotiators and the Structure of Negotiation Problems") is Director of the Center for Policy Research and Associate Professor of Public Administration and Policy at the Nelson A. Rockefeller College of Public Affairs and Policy, State University of New York at Albany. He received his B.A. from the College of William and Mary and his Ph.D. in Social and Quantitative Psychology from the University of Colorado, Boulder. His research focuses on negotiation, judgment and decision making processes, and risk analysis, and he has authored numerous publications in these areas.

Jay F. Nunamaker, Jr. ("Information Technology for Negotiating Groups: Generating Options for Mutual Gain") is Head of the Depart-

ment of Management Information Systems and Professor of MIS and Computer Sciences at the University of Arizona. He received his Ph.D. from Case Institute of Technology in Systems Engineering and Operations Research. He was Associate Professor of Computer Science and Industrial Management at Purdue University, before joining the University of Arizona in 1974 to develop the MIS program. He has authored numerous papers on group support systems, the automation of software construction, performance evaluation of computer systems, and decision support systems for systems analysis and design, and has lectured throughout Europe (including the USSR), Asia, and South America.

V. Srinivasan Rao ("Computer Support of Groups: Theory-Based Models for GDSS Research") is Assistant Professor of Management Information Systems, Faculty of Commerce, University of British Columbia. He received his B. Tech. in Chemical Engineering from the Indian Institute of Technology, Madras, India, his M.S. in Chemical and Petroleum Refining Engineering from the Colorado School of Mines, Golden, Colorado, and his Ph.D. in Management Science and Information Systems from the University of Texas at Austin. His current research interests include the computer support of groups and managerial issues in computing. He has published in *MIS Quarterly* and several conference proceedings.

William Samuelson ("Final-Offer Arbitration under Incomplete Information") is Professor of Economics at the School of Management, Boston University, Boston, MA 02215. He received his B.A. and Ph.D. degrees from Harvard University. His research interests include game theory, bidding, bargaining, and decision making under uncertainty. He has published a variety of articles in these areas in leading economics and management science journals.

Melvin F. Shakun ("Airline Buyout: Evolutionary Systems Design and Problem Restructuring in Group Decision and Negotiation" and Special Editor, *Focussed Issue on Group Decision and Negotiation*) is Professor of Operations Research and Statistics at the Leonard N. Stern School of Business of New York University. His current research interests involve the management science/artificial intelligence interface, evolutionary systems design, and group decision and negotiation support systems. He is author of the book, *Evolutionary Systems Design: Policy Making under Complexity and Group Decision Support Systems*, Holden-Day, Oakland, 1988. Dr. Shakun is founding editor-in-chief of the new international journal, *Group Decision and Negotiation*, and an editor of *Theory and Decision*.

Katia P. Sycara ("Problem Restructuring in Negotiation") is a Research Scientist in Carnegie Mellon University's Robotics Institute and the

Director of the Laboratory for Enterprise Integration. Her research interests include knowledge-based systems, case-based reasoning, distributed systems, negotiation models for multi-agent planning, and constraint-directed reasoning, with special emphasis on integrating operations research and AI methods to address manufacturing problems. She received her Ph.D. in Computer Science from the Georgia Institute of Technology, her M.S. from the University of Wisconsin and her B.S. from Brown University. She is a member of the American Association of Artificial Intelligence, ACM, the IEEE Computer Society and The Institute of Management Sciences.

Stan Szpakowicz ("Restructurable Representations of Negotiation") is Associate Professor of Computer Science at the University of Ottawa. He received his doctorate from Warsaw University, Poland. His research interests, other than decision analysis and support, cover natural language acquisition, knowledge representation and logic programming. He has published over 40 research papers, and written or edited six books. He has also written over 10 surveys and popular articles in books and scientific journals.

Joseph S. Valacich ("Information Technology for Negotiating Groups: Generating Options for Mutual Gain") is Assistant Professor of Decision and Information Systems at Indiana University. He received a bachelors degree in Computer Science and M.B.A. from the University of Montana, and a Ph.D. from the University of Arizona in 1989. Dr. Valacich worked for several years in the information systems field as a programmer, analyst and product manager. His research interests are in group decision behavior, focusing primarily on the design and investigation of group support technologies on group and organizational processes and performance. His publications on these and related topics include an edited book and articles in *Management Science*, *Communications of the ACM*, *IEEE Transactions on Systems, Man, and Cybernetics*, and *International Journal on Man-Machine Studies*.

Douglas R. Vogel ("Information Technology for Negotiating Groups: Generating Options for Mutual Gain") is Assistant Professor of MIS at the University of Arizona. He has been involved with computers and computer systems in various capacities for over 20 years. He received his M.S. in Computer Science from UCLA in 1972 and his Ph.D. in Business Administration in 1986 from the University of Minnesota, where he was also research coordinator for the MIS Research Center. His current research interests bridge the business and academic communities in addressing questions of the impact of management information systems on aspects of interpersonal communication, group decision making, and organizational productivity.
