With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Reza H. Ahmadi ("The Dynamic Line Allocation Problem") is Assistant Professor in the Anderson Graduate School of Management at UCLA. He received his Ph.D. in Operations Management from the University of Texas at Austin. His research interests include the product design, design for assembly, production planning, scheduling, and control of manufacturing operations. His works have appeared in *Operations Research*, *Naval Research Logistics*, and *European Journal of Operational Research*.

Harish C. Bahl ("A Lagrangean Relaxation Approach for Very-Large-Scale Capacitated Lot-Sizing") is Professor in the Accounting and Management Science Department at College of Business, California State University-Chico. He received a Ph.D. in Production and Operations Management from the Ohio State University, M. Tech. in Industrial Engineering from Indian Institute of Technology, Kharagpur, and B. E. in Mechanical Engineering from Delhi University, India. He is author/coauthor of over 25 papers in Manufacturing Resource Planning and Management Information Systems. His publications have appeared in *Operations Research*, *The International Journal of Production Research*, *IIE Transactions*, *Journal of Operations Management*, *European Journal of Operational Research*, *Journal of the Operational Research Society*, *Production and Inventory Management* and several other journals.

Pradeep K. Chintagunta ("An Empirical Investigation of Advertising Strategies in a Dynamic Duopoly") is Assistant Professor of Marketing at the S. C. Johnson Graduate School of Management, Cornell University, Ithaca, New York. He is a 1990 Ph.D. in Marketing from Northwestern University. His research interests include the study of household choice behavior and its implications for retailer pricing decisions, and the investigation of firm level competitive advertising and pricing strategies. Econometric modeling of these and other related issues is his primary research focus. He has also published in *Marketing Science*, *Journal of Marketing Research*, *International Journal of Research in Marketing* and *Journal of Business-to-Business Marketing*.

Sriram Dasu ("The Dynamic Line Allocation Problem") is Assistant Professor in the Anderson Graduate School of Management at UCLA. He received his Ph.D. in Operations Management from the Sloan School of Management, MIT. His research interests include queueing network models, production planning, management of design and international operations.

Alan H. DeCherney ("To Be or Not to Be?

That Is Conception! Managing In Vitro Fertilization Programs"). See Edward H. Kaplan.

Moustapha Diaby ("A Lagrangean Relaxation Approach for Very-Large-Scale Capacitated Lot-Sizing") is Professor in the College of Business at Arizona State University, Tempe, Arizona. He received a Ph.D. in Management Science, M.S. in Industrial Engineering and B.S. in Chemical Engineering from the State University of New York at Buffalo. His areas of research include mathematical programming, production planning and scheduling, vehicle routing and scheduling, and multiple criteria decision making. His publications have appeared in *Operations Research*, *European Journal of Operational Research* and *Journal of the Operational Research Society*.

Salah E. Elmaghraby ("The Analysis of Activity Networks under Generalized Precedence Relations (GPRs)") is University Professor, Operations Research and Industrial Engineering, North Carolina State University (NCSU). He was Director, Graduate Program in Operations Research, 1967–1990. Previously Associate Professor Yale University (1962–67); Research Leader, the Western Electric Engineering Research Center (1958–62). Dr. Elmaghraby has 12 years of industrial experience. His international academic experience includes: guest lecturer in Aachen (Germany), Alexandria (Egypt), Eindhoven (Holland), Birmingham (England), Dahrn (Saudi Arabia); Grenoble and Lyon (France), Louvain (Belgium), Linköping (Sweden). He was recipient of the IE Distinguished Research Award in 1980 and was elected Fellow of the Institute of Industrial Engineering in 1986. He was recipient of the R. J. Reynolds Distinguished Award in Research and Education, 1987, and the Kuwait Foundation for the Advancement of Science, 1989. He was named Thomson Distinguished Professor in Production, Lyon, France, 1991, and is President-Elect of the NCSU chapter of Sigma Xi for 1992–93.

Gary Erickson ("Gaining Comparative Advantage through Discretionary Expenditures: The Returns to R&D and Advertising") is Associate Professor in the Department of Marketing and International Business at the University of Washington. He received his Ph.D. in Business from Stanford University and held a faculty position at the Wharton School, University of Pennsylvania, before moving to Washington. He is an active member of TIMS and the American Marketing Association, and currently serves as an Associate Editor of *Management Science*.

Peter W. Glynn (NOTES: Pathwise Convexity

and Its Relation to Convergence of Time-Average Derivatives”) received the Ph.D. degree from Stanford University in 1982. He spent five years as an Assistant Professor in the Department of Industrial Engineering at the University of Wisconsin-Madison. He is currently an Associate Professor in the Department of Operations Research at Stanford University. His research interests include stochastic systems, computational probability, and simulation.

Avner Hershlag (“To Be or Not to Be? That Is Conception! Managing In Vitro Fertilization Programs”). See Edward H. Kaplan.

Ananth. V. Iyer (“Analysis of the Deterministic (s , S) Inventory Problem”) is Associate Professor of Production Management at the Graduate School of Business at the University of Chicago. His research interests include building models to analyze problems in production, distribution and logistics. His papers have appeared in *Management Science*, *Networks*, *Discrete Applied Mathematics*, *Information Processing Letters*, *European Journal of Operational Research* and *Journal of Mathematical Sociology*. He has a Ph.D. from the School of Industrial and Systems Engineering at Georgia Institute of Technology, an M.S. in Industrial Engineering and Operations Research from Syracuse University and a B.Tech. in Mechanical Engineering from the Indian Institute of Technology at Bombay.

Robert Jacobson (“Gaining Comparative Advantage through Discretionary Expenditures: The Returns to R&D and Advertising”) is Associate Professor in the Department of Marketing and International Business at the University of Washington.

Jerzy Kamburowski (“The Analysis of Activity Networks under Generalized Precedence Relations (GPRs)”) is Associate Professor, Information Systems and Operations Management, The University of Toledo. He was Assistant and Associate Professor at Wroclaw Technical University, Poland (1980–1989) and Visiting Associate Professor of Graduate Program in Operations Research, North Carolina State University (1989). He holds a Habilitation Degree from the Economical Academy of Wroclaw, Poland (1988), and a Ph.D. (1980) and M.S. (1977) from the Wroclaw Technical University, Poland. Dr. Kamburowski’s research involves network models in OR/MS including CPM and PERT networks, flow networks, and reliability networks. He has published over 30 articles in *European Journal of Operational Research*, *Operations Research*, *RAIRO Operations Research*, *Journal of the Operational Research Society*, *SIAM Journal on Computing*, *Networks*, and others.

Edward H. Kaplan (“To Be or Not to Be? That Is Conception! Managing In Vitro Fertilization Programs”) is Associate Professor of Policy Modeling and Public Management, Op-

erations Research, and Medicine at Yale University. Drs. Avner Hershlag, Alan H. DeCherney, and Gady Lavy are all medical experts in assisted reproductive technologies, including in vitro fertilization-embryo transfer (IVF-ET), and all are former professors in the Department of Obstetrics and Gynecology at the Yale School of Medicine. This collaboration developed naturally in response to queries regarding the chance of achieving a viable pregnancy in the Yale IVF-ET program. Since the completion of this paper, Dr. Hershlag has joined Cornell University-North Shore Medical Center, Dr. DeCherney has joined the Tufts-New England Medical Center, and Dr. Lavy has entered private practice. Professor Kaplan remains at Yale, where his research addresses the design, evaluation and modeling of AIDS intervention programs.

Mark H. Karwan (“A Lagrangean Relaxation Approach for Very-Large-Scale Capacitated Lot-Sizing”) is Professor and Chair, Department of Industrial Engineering, State University of New York at Buffalo. He has a B.E.S. and M.S.E. from the Johns Hopkins University and a Ph.D. from the Georgia Institute of Technology. His areas of research include mathematical programming, multiple criteria decision making and vehicle routing and scheduling. His is an author of over 50 publications in journals, books and proceedings. His research has been supported by the National Science Foundation and the Office of Naval Research. He currently serves as associate editor of *Naval Research Logistics*, *IIE Transactions*, and *Computers & Operations Research*.

Gady Lavy (“To Be or Not to Be? That Is Conception! Managing In Vitro Fertilization Programs”). See Edward H. Kaplan.

Hau L. Lee (“Lot Sizing to Reduce Capacity Utilization in a Production Process with Defective Items, Process Corrections, and Rework”) is Professor of Industrial Engineering and Engineering Management at Stanford University. He holds an M.S. in Operations Research from the London School of Economics and a Ph.D. in Operations Research from the Wharton School of the University of Pennsylvania. His areas of specialization are: inventory management, production planning and control, and quality assurance. Professor Lee is an associate editor of *Management Science* and *Operations Research*, an area editor of the *IIE Transactions*, and is on the editorial board of *Journal of Manufacturing and Operations Management*.

Andrew R. Schotter (“Behavioral Consequences of Corporate Incentives and Long-Term Bonuses: An Experimental Study”) is Full Professor of Economics at New York University and Chairman of the Economics Department. He received his B.S. degree from Cornell University and his Ph.D. from New York University. He has done work in applied game theory and experimental economics. Address: Department of

Economics, New York University, 269 Mercer Street, New York, New York 10003, telephone: 212-998-8909.

Linus E. Schrage ("Analysis of the Deterministic (s, S) Inventory Problem") is Professor of Applied Mathematics and Production Management at the Graduate School of Business of the University of Chicago. He researches the development of easy-to-use modeling systems, and the use of models in the management of operations, particularly manufacturing.

Christopher S. Tang ("The Dynamic Line Allocation Problem") is affiliated with the John Anderson Graduate School of Management at UCLA as an Associate Professor of Management Science. He received his B.Sc. (Honors) in Mathematics from King's College, University of London, his M.A. in Statistics and his Ph.D. in Management Science from Yale University. His current research interests include production planning, manufacturing system design, and capacity planning. He is an Associate Editor for *Management Science*, *Operations Research* and *IIE Transactions*.

Naufel J. Vilcassim ("An Empirical Investigation of Advertising Strategies in a Dynamic Duopoly") is Associate Professor of Marketing at the University of Southern California, Los Angeles, California. He earned his Ph.D. degree in Management from Cornell University in 1986. His research interests are in the areas of consumer demand theory, pricing and price promotions, panel data analysis, and the dynamic modeling of marketing mix decisions. His research articles have appeared in *Marketing Science*, *Journal of Marketing Research*, *International Journal of Research in Marketing*, and other journals. He is a member of the editorial board of *Marketing Science*. He is also a member of The Institute of Management Sciences, The

American Statistical Association and The American Marketing Association.

Keith Weigelt ("Behavioral Consequences of Corporate Incentives and Long-Term Bonuses: An Experimental Study") is Associate Professor of Management at the Wharton School, University of Pennsylvania. He received his Ph.D. from Northwestern University in Strategy. Keith's research interests focus on the empirical testing of game-theoretic models in simple laboratory settings. He has done research on managerial compensation structures, tournaments, market behavior, and reputation building. Address: The Wharton School, University of Pennsylvania, SH-DH 2022, Philadelphia, PA 19104, telephone: (215) 898-6369.

Robert J. Wittrock ("NOTES: Operator Assignment and the Parametric Preflow Algorithm") is Research Staff Member in the Manufacturing Research Department of IBM Research. He holds a B.S. in Mathematics from the University of the Pacific, and an M.S. and Ph.D. in Operations Research from Stanford University. His research interests are in the application of mathematical programming techniques to manufacturing problems.

Stanley Zionts ("A Lagrangean Relaxation Approach for Very-Large-Scale Capacitated Lot-Sizing") is Alumni Professor of Management Science and Systems at the School of Management, State University of New York at Buffalo. He spent the fall semester of 1991 teaching at the Montpellier School of International Studies in Montpellier, France, which has a joint program with the School of Management in Buffalo. Professor Zionts has published several books and over 80 articles in books, proceedings and journals including *Management Science* and *Operations Research*. He is associate editor of *Management Science*, *Naval Research Logistics* and *Multiple Criteria Decision Analysis*.
