LETTERS TO THE EDITOR

Dear Sir:

I would like to make some comments regarding my article "Ss Inventory Policy with Variable Delivery Time" published in the July issue of *Management Science*. On page 434, the upper limit of the summation in the definition of P_1 should be $k + (Q + 1)P(\tau - 1) + 1$. Further every $P(\tau)$ from eq. (6) on should be replaced by $P(\tau - 1)$.

The words "not considering demand" should be added to the heading of column 3, Table A. Equation (8) is the last equation in the text, and equation (7) is directly above the one so marked in the text.

Yours truly,
RAOUL J. FREEMAN
Stanford Research Institute
Menlo Park, California
