With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

MATHEMATICS OF OPERATIONS RESEARCH

Editor-in-Chief. J. G. “Jim” DAI, School of Operations Research and Information Engineering, Cornell University, Ithaca, New York 14853; jimdaimor@gmail.com

Area Editors.

Marc TEBoulLE (Continuous Optimization), School of Mathematical Sciences, Tel Aviv University, Tel Aviv, Israel; tebouille@post.tau.ac.il

Jens VYGEN (Discrete Optimization), Research Institute of Discrete Mathematics, University of Bonn; vygen@or.uni-bonn.de

Adam SHWARTZ (Stochastic Models), Julius M. and Bernice Naiman Chair in Engineering, Department of Electrical Engineering, Technion - Israel Institute of Technology, Haifa, Israel; adam.mor@ee.technion.ac.il

Bernhard VON STENGEL (Game Theory), Department of Mathematics, London School of Economics, London WC2A 2AE, United Kingdom; stengel@nash.lse.ac.uk

Associate Editors. Baris Ata, Booth School of Business, University of Chicago; Nikhil Bansal, Dept. of Mathematics and Computer Science, Eindhoven University of Technology; Imre Bárány, Alfréd Rényi Mathematical Institute of the Hungarian Academy of Sciences; Amitabh Basu, Dept. of Applied Mathematics and Statistics, Johns Hopkins University; Erhan Bayraktar, Dept. of Mathematics, University of Michigan; Amir Beck, Faculty of Industrial Engineering and Management, Technion; Jose Blanchet, Dept. of Industrial Engineering and Operations Research, Columbia University; Jérôme Bolte, Toulouse School of Economics, University Toulouse 1 Capitole; Samuel Burer, Dept. of Management Sciences, University of Iowa; Chandra Chekuri, Dept. of Computer Science, University of Illinois, Urbana–Champaign; Xin Chen, Dept. of Industrial and Enterprise Systems Engineering, University of Illinois, Urbana–Champaign; Patrick Cheridito, Dept. of Operations Research and Financial Engineering, Princeton University; Roberto Cominetti, Department of Mathematics Engineering, University of Chile; Aris Daniilidis, Department of Mathematics Engineering, University of Chile; Ton Dieker, School of Industrial & Systems Engineering, Georgia Institute of Technology; Ezra Einy, Dept. of Economics, Ben-Gurion University; Eugene Feinberg, Dept. of Applied Mathematics and Statistics, State University of New York at Stony Brook; Michal Feldman, Blavatnic School of Computer Science, Tel Aviv University; Michael Friedlander, Department of Mathematics, University of California, Davis; David Gamarnik, Sloan School of Management, MIT; Olivier Gossner, CNRS Ecole Polytechnique and London School of Economics; Satoru Iwata, Dept. of Mathematical Informatics, University of Tokyo; Sandeep Juneja, School of Technology and Computer Science, Tata Institute of Fundamental Research; Michael Katehakis, Rutgers University; Jussi Keppo, National University of Singapore; Steven Kou, Industrial Engineering and Operations Research, Columbia University; Daniel Kuhn, College of Management of Technology, EPFL; Jean Bernard Lasserre, LAAS-CNRS, Toulouse, France; Adrian Lewis, School of Operations Research and Industrial Engineering, Cornell University; Andrea Lodi, Dept. of Electrical, Electronic, and Information Engineering, University of Bologna; Yishay Mansour, School of Computer Science, Tel Aviv University; Hervé Moulin, Adam Smith Business School, University of Glasgow; Kavita Ramanan, Dept. of Mathematical Sciences, Brown University; Josh Reed, Leonard N. Stern School of Business, New York University; Jérôme Renault, University Toulouse 1 Capitole; Tim Roughgarden, Dept. of Computer Science, Stanford University; Paat Rusmevichientong, Marshall School of Business, University of Southern California; Andrzej Ruszczyński, Dept. of Management Science and Information Systems, Rutgers University; Alexander Shapiro, School of Industrial & Systems Engineering, Georgia Institute of Technology; Nahum Shimkin, Faculty of Electrical Engineering, Technion; Eran Shmaya, Dept. of Statistics and Operations Research, Tel Aviv University; David B. Shmoys, School of OR and Information Engineering, Cornell University; Eilon Solan, School of Mathematical Sciences, Tel Aviv University; Levent Tunçel, Dept. of Combinatorics and Optimization, The University of Waterloo; Lieven Vanderberghe, Department of Electrical Engineering, University of California, Los Angeles; Johan van Leeuwen, Department of Mathematics and Computer Science, Technische Universiteit Eindhoven; Nicolas Vieille, Dept. of Economics and Decision Sciences, HEC Paris; Henry Wolkowicz, University of Waterloo; Ya-Xiang Yuan, Institute of Computational Mathematics and Scientific/Engineering Computing, Chinese Academy of Sciences; Thaleia Zariphopoulou, Department of Mathematics and IROM, The University of Texas at Austin; Jiawei Zhang, Leonard N. Stern School of Business, New York University; Xunyu Zhou, University of Oxford and Chinese University of Hong Kong.

Advisory Editors. Kenneth J. ARROW; Robert J. AUMANN; Ronald L. GRAHAM; Alan J. HOFFMAN; Richard M. KARP; Alvin E. ROTH; Lloyd S. SHAPLEY; Éva TARDOS; Ward WHITT.

Editorial Process. All papers are reviewed. Decisions on papers are made by the editor-in-chief or an area editor with the advice of associate editors and referees. An effort is made to review papers rapidly and to publish papers within eight months of acceptance. Authors who are dissatisfied with the handling of their paper may appeal to the editor-in-chief. Authors of an accepted paper must sign a statement transferring copyright to INFORMS; they should direct inquiries regarding their paper to the production editor at chochee.cheung@informs.org.

Subscriptions and Back Issues. 2016 subscription prices for U.S. addresses per volume, print and online: institutions—\$513.00, members—\$85.00, students and retired members—\$43.00. For additional subscription options and rates and/or to subscribe online, go to <http://pubsonline.informs.org/page/prices-and-ordering>. For back issues, email your request to informs@informs.org or call 1-800-446-3676.

Copyright. *Mathematics of Operations Research* (ISSN 0364-765X) is a quarterly journal published in February, May, August, and November by the Institute for Operations Research and the Management Sciences at 5521 Research Park Drive, Suite 200, Catonsville, MD 21228. Periodicals postage paid at Baltimore, Maryland, and at additional mailing offices. POSTMASTER: Send address changes to Mathematics of Operations Research, INFORMS, 5521 Research Park Drive, Suite 200, Catonsville, MD 21228. Copyright 2016, Institute for Operations Research and the Management Sciences.

Permissions. Permission to make digital/hard copy of part or all of this work for personal or classroom use is granted without fee provided that copies are not made or distributed for profit or commercial advantage, the copyright notice, the title of the publication and its date appear, and notice is given that copying is by permission of the Institute for Operations Research and the Management Sciences (INFORMS). Distribution through coursepacks is permitted provided that permission is obtained from INFORMS and a fee is paid. To republish, post on servers, or redistribute to lists requires prior specific permission and, in some cases, a fee. Address requests regarding reprint permission to the Institute for Operations Research and the Management Sciences, 5521 Research Park Drive, Suite 200, Catonsville, MD 21228, permissions@informs.org. To copy otherwise is permitted, provided that a per-copy fee is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, www.copyright.com.

(Continued from inside front cover)

Editorial Policy. *Mathematics of Operations Research* is an international journal of the Institute for Operations Research and the Management Sciences. The journal publishes excellent foundational articles having significant mathematical contents and relevance to operations research and management science. The journal invites articles concerned with the mathematical and computational foundations in the areas of continuous, discrete and stochastic optimization; mathematical programming; dynamic programming; stochastic processes; stochastic models; simulation methodology; control and adaptation; networks; game theory; and decision theory. Also sought are innovative and mathematical theories of inventory, manufacturing, and distribution; organization, finance, and marketing; routing, queuing, and scheduling; data and storage management; location, reliability, search, measurement, and service; artificial intelligence; and machine learning among others. Contributions to mathematics that have special relevance for operations research and management science are encouraged. The emphasis is on originality, quality, and importance. Significant developments in operations research and management science not having substantial mathematical interest should be directed instead to *Management Science* or *Operations Research*.

Submission of Manuscripts. Manuscripts should be submitted to the appropriate area editor or, in case the area is not easy to identify, to the editor-in-chief. A manuscript should be submitted by sending an email letter with a PDF (or postscript) file of the manuscript as an attachment. Email addresses of the editor-in-chief and the area editors are listed on the inside front cover. The submission procedure is subject to change, so authors should check the journal website at <http://pubsonline.informs.org/journal/moor> for updates. Authors are also expected to provide a LaTeX file if the paper is accepted. To assist referees, copies of relevant unpublished or inaccessible references should also be submitted, preferably in electronic form. By submitting a manuscript, the authors represent that they consider it ready for publication and that it has not been published or submitted for publication elsewhere. As a condition of final acceptance of a paper for publication in *Mathematics of Operations Research*, the author(s) must indicate if their paper is posted on a working papers website, other than their own. They are responsible for assuring that, if any part of the paper has been copyrighted for prepublication as a working paper, the copyright can and will be transferred to INFORMS when the paper has been accepted. This includes both print and electronic forms of the paper. Authors may post their author accepted manuscript (AAM) on personal websites immediately after acceptance, and may post AAMs in noncommercial institutional repositories 12 months after INFORMS publishes the final typeset version online; AAMs must include the DOI link provided by INFORMS to the version of record. Additional information can be found at <http://pubsonline.informs.org/page/moor/submission-guidelines>.

Manuscript Style. Manuscripts should be in English, double spaced throughout. Manuscripts should include a self-contained abstract of up to 150 words, describing the main results, and should also provide *key words*. Any *acknowledgments* should appear at the end of the paper, before the references. Full references will be printed as below; abbreviations for journals are to be taken from the most recent index of *Mathematical Reviews*.

- [1] Cohen JW (1969) *The Single Server Queue* (North-Holland, Amsterdam).
- [2] Eaves BC (1971) The linear complementarity problem. *Management Sci.* 17(9):613–634.
- [3] Gale D, Kuhn HW, Tucker AW (1951) Linear programming and the theory of games. Koopmans TC, ed. *Activity Analysis of Production and Allocation* (Wiley, New York), 317–329.
- [4] Karmarkar N, Karp RM (1982) The differencing method of set partitioning. Report UCB/CS 82/113, Computer Science Division, University of California, Berkeley.

Articles in Advance. For timely distribution of research, *Mathematics of Operations Research* provides *Articles in Advance*, the early release of articles online before they are assigned to an issue. The articles have been approved by the editors, copyedited, typeset, and the final proofs have been reviewed by the authors. The content of the *Articles in Advance* version is the version of record. Articles will remain on *Articles in Advance* until selected for an issue by the journal's editor-in-chief. At that time, minor mechanical and typesetting corrections to the article text may be made to accommodate the printed issue.

Editors of INFORMS Publications. *Decision Analysis*: Rakesh K. SARIN, University of California, Los Angeles; *Information Systems Research*: Ritu AGARWAL, University of Maryland; *INFORMS Journal on Computing*: David L. WOODRUFF, University of California, Davis; *INFORMS Transactions on Education*: Jeroen BELIEN, KU Leuven; *Interfaces*: Srinivas BOLLAPRAGADA, General Electric Global Research Center; *Management Science*: Teck-Hua HO, National University of Singapore; *Manufacturing & Service Operations Management*: Christopher S. TANG, University of California, Los Angeles; *Marketing Science*: K. SUDHIR, Yale University; *Mathematics of Operations Research*: J. G. "Jim" DAI, Cornell University; *Operations Research*: Stefanos ZENIOS, Stanford University; *Organization Science*: Zur SHAPIRA, New York University; *Service Science*: Paul P. MAGLIO, University of California, Merced; *Strategy Science*: Daniel A. LEVINHAL, University of Pennsylvania; *Transportation Science*: Martin SAVELSBERGH, Georgia Institute of Technology; *Tutorials in Operations Research*: J. Cole SMITH, Clemson University; *IAOR Editor-in-Chief*: K. Preston WHITE Jr., University of Virginia; *IAOR Associate Editor*: N. Peter WHITEHEAD, University of Virginia; *IAOR Associate Contributing Editors for INFORMS Journals*: Bradford D. ALLEN, Lasell College; Mahyar AMOUZEGAR, RAND Corporation; T. Eugene DAY, Washington University; James K. HIGGINSON, University of Windsor; Benjamin LEV, Drexel University; Douglas J. MORRICE, University of Texas at Austin; Frederic MURPHY, Temple University; Susan PALOCSAY, James Madison University.

INFORMS Board. President: Edward H. KAPLAN, Yale University; President Elect: Brian DENTON, University of Michigan; Past President: L. Robin KELLER, University of California, Irvine; Secretary: Pinar KESKINOCAK, Georgia Institute of Technology; Treasurer: Sheldon H. JACOBSON, University of Illinois at Urbana-Champaign; Vice President—Chapters/Student Chapters/Fora: David HUNT, Oliver Wyman; Vice President—Education: Jill Hardin WILSON, Northwestern University; Vice President—Information Technology: Marco LUEBBECKE, RWTH Aachen University; Vice President—International Activities: Grace LIN, Institute for Information Industry (III); Vice President—Marketing, Communications, & Outreach: Laura A. MCLAY, University of Wisconsin-Madison; Vice President—Meetings: Ronald G. ASKIN, Arizona State University; Vice President—Membership & Professional Recognition: Susan E. MARTONOSI, Harvey Mudd College; Vice President—Practice Activities: Jonathan H. OWEN, General Motors Global R&D; Vice President—Publications: Jonathan F. BARD, University of Texas at Austin; Vice President—Sections/Societies: Esma S. GEL, Arizona State University; Executive Director: Melissa MOORE, INFORMS.
