With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

CONTENTS

Volume 40

January–February 1992

Number 1

EDITORIAL	2	Job Shop Scheduling by Simulated Annealing Peter J. M. Van Laarhoven, Emile H. L. Aarts and Jan Karel Lenstra	113
IN THIS ISSUE	4		
OR FORUM		Lot Sizing Policies for Finite Production Rate Assembly Systems Derek Atkins, Maurice Queyranne and Daning Sun	126
The Lessons of Flowshop Scheduling Research R. A. Dudek, S. S. Panwalkar and M. L. Smith	7		
OR PRACTICE		A Model for Continuous-Review Pull Policies in Serial Inventory Systems Ralph D. Badinelli	142
Design and Implementation of an Interactive Optimization System for Telephone Network Planning Carolyn Jack, Sheng-Roan Kai and Alexander Shulman	14	The Power-Series Algorithm Applied to the Shortest-Queue Model J. P. C. Blanc	157
An Airline Seat Management Model for a Single Leg Route When Lower Fare Classes Book First Richard D. Wollmer	26	On a “No Arrivals” Heuristic for Single Machine Stochastic Scheduling N. A. Fay and K. D. Glazebrook	168
ARTICLES		A Shortest Augmenting Path Algorithm for the Semi-Assignment Problem J. Kennington and Z. Wang	178
The SML Language for Structured Modeling: Levels 1 and 2 Arthur M. Geoffrion	38	TECHNICAL NOTE	
The SML Language for Structured Modeling: Levels 3 and 4 Arthur M. Geoffrion	58	On the Convergence of Miehle’s Algorithm for the Euclidean Multifacility Location Problem J. B. Rosen and G. L. Xue	188
Games of Boldness, Where the Player Performing the Hardest Task Wins Mordechai Henig and Barry O’Neill	76	ERRATA	
Validation of Simulation Analysis Methods for the Schruben-Margolin Correlation- Induction Strategy Jeffrey D. Tew and James R. Wilson	87	Corrections to “Finding Optimal (s, S) Policies Is About as Simple as Evaluating a Single Policy” Yu-Sheng Zheng and Awi Federgruen	192
Optimal Dispatch of Interruptible and Curtailable Service Options Douglas W. Caves and Joseph A. Herriges	104	CONTRIBUTORS	193
		<i>Cover Illustration: An example of echelon inventories. From “Lot Sizing Policies for Finite Production Rate Assembly Systems” by Atkins, Queyranne and Sun, p. 141.</i>
