Appreciation to Referees

THE EDITOR and the Associate Editors take this opportunity to thank the following individuals who have acted as referees during the period April 1959–October 1960. The JOURNAL, as well as the authors of many of the published papers, have benefited greatly from their critical reviews. Without their willing cooperation, it would be impossible for the SOCIETY to publish a journal of high professional standard.

The last previous list of referees was published on pages 415–419 of Volume 7 (May–June 1959), covered a period of 27 months, and included 189 names. The present list covers a period of 19 months and contains 258 names. The difference results from a very substantial increase in the amount of material being submitted for publication, and a greater discrimination in selecting the material actually published.
