ABOUT AUTHORS

Stephen R. Barley ("Images of Imaging: Notes on Doing Longitudinal Field Work") is an Assistant Professor of Organizational Behavior at Cornell University's School of Industrial and Labor Relations. He received his doctorate in Organization Studies from the Massachusetts Institute of Technology. Barley's research focuses on the implications of new technologies for social organization of work. He is currently involved in an investigation of the role that interorganizational networks have played in the commercialization of biotechnology in the United States.

D. Harold Doty ("Studying Changes in Organizational Design and Effectiveness: Retrospective Event Histories and Periodic Assessments") is an Assistant Professor of Management at the University of Arkansas, Fayetteville. His current research interests include configurational theories, organizational design and effectiveness, and strategic management. He expects to receive his Ph.D. degree (in Organization Science) from The University of Texas at Austin in late 1990.

William H. Glick ("Studying Changes in Organizational Design and Effectiveness: Retrospective Event Histories and Periodic Assessments") is Associate Professor of Management of the University of Texas at Austin. His main research is on job and organizational design. He is currently co-principal investigator (with George Huber) on a large sample longitudinal study of Changes in Organizational Design and Effectiveness funded by the Basic Research Unit of the Army Research Institute. He is also Principal Investigator on a study of work and information flows funded by IBM. He received his Ph.D. degree from the University of California at Berkeley (1981).

George P. Huber ("Studying Changes in Organizational Design and Effectiveness: Retrospective Event Histories and Periodic Assessments") is the Fondren Foundation Chaired Professor of Business at The University of Texas at Austin. His research focuses on organization theory, design, and decision making, and he has written three books and over 70 articles and book chapters on these topics. In 1983, his pioneering article on the nature and design of post-industrial organizations was awarded First Prize in the International Prize Competition sponsored by The Institute of Management Sciences College on Organization.

Dorothy Leonard-Barton ("A Dual Methodology for Case Studies: Synergistic Use of a Longitudinal Single Site with Replicated Multiple Sites"), Associate Professor, joined the Harvard Business School faculty in 1983, after teaching at the Sloan School of Management, MIT, for three years. She has taught M.B.A. courses in manufacturing, technology management and technology transfer, and executive courses on a wide range of technology-related topics. Her major research interests and consulting expertise are in the development and transfer of technology, both within the corporation (e.g., from research and development into operations) and across national boundaries. She has consulted and taught about technology management for governments and major corporations. She publishes in academic journals such as *Management Science* and *Research Policy* and practitioner journals such as the *Sloan Management Review* and *Harvard Business Review*. She is currently working on a book about the transfer of newly developed technologies from laboratory settings into operations. Her Ph.D. is from Stanford University.

C. Chet Miller ("Studying Changes in Organizational Design and Effectiveness: Retrospective Event Histories and Periodic Assessments") is an Assistant Professor of Management at Baylor University and a doctoral candidate at the University of Texas at Austin. His current research interests are centered on top management teams and organizational design.

Andrew Pettigrew ("Longitudinal Field Research on Change: Theory and Practice") is Professor of Organisational Behaviour in Warwick University. He is also Director of the Centre for Corporate Strategy and Change in the Warwick Business School. He received his Ph.D. in 1970 from Manchester University and has taught and researched at Yale University, London Business School, the European Institute for Advanced Studies in Management, Brussels, Harvard Business School, and Warwick University. He received an Honorary Doctorate from Linköping University in Sweden in 1989. Professor Pettigrew is Chairman of the Executive Committee of the British Academy of Management. He is also on the Industry, Economy and Environment Research and Development Group of the Economic and Social Research Council and a member of the Joint Committee of the Eco-

conomic and Social Research Council and the Science and Engineering Research Council of the United Kingdom.

M. Scott Poole ("Methods for Studying Innovation Development in the Minnesota Innovation Research Program") is Associate Professor of Speech-Communication at the University of Minnesota. He obtained his Ph.D. in Communication Arts from the University of Wisconsin at Madison in 1980, and taught at the University of Illinois at Urbana-Champaign from 1979 to 1985 before his present appointment. His current research interests are innovation and change in organizations, the role of information systems in group decisions, and organizational climates and communication networks. He is coeditor (with A. H. Van de Ven and H. L. Angle) of *Research on the Management of Innovation: The Minnesota Studies*, New York: Ballinger/Harper & Row, 1989.

Kathleen M. Sutcliffe ("Studying Changes in Organizational Design and Effectiveness: Retrospective Event Histories and Periodic Assessments") is a doctoral student and candidate for the Ph.D. in Organization Science at the University of Texas at Austin. Her dissertation research concerns the determinants of top managers' perceptions of the

environment. She is also interested in environmental interpretation, organizational responsiveness to environmental change, institutional processes, and strategic choice processes.

Andrew H. Van de Ven ("Methods for Studying Innovation Development in the Minnesota Innovation Research Program") is 3M Professor of Human Systems Management in the Curtis L. Carlson School of Management and Director of the Minnesota Innovation Research Program in the Strategic Management Research Center of the University of Minnesota. He received his Ph.D. from the University of Wisconsin at Madison in 1972, and taught at Kent State University (1972-1975) and the Wharton School of the University of Pennsylvania (1975-1981) before his present appointment. An elaboration of the paper coauthored in this issue is available in A. H. Van de Ven, H. L. Angle and M. S. Poole (eds.), *Research on the Management of Innovation: The Minnesota Studies*, New York: Ballinger/Harper & Row, 1989. This book was awarded an honorable mention by the American Association of Publishers in the category of business and professional publications—a distinction it granted to only two books published in 1989.

Conference on Corporate Governance and Competitive Strategy

Minneapolis, MN — October 25-26, 1990

The Strategic Management Research Center and the Carlson School of Management, University of Minnesota, will hold an interdisciplinary conference on corporate governance and competitive strategy. The conference will focus on contributions of agency theory and transaction cost economics to the study of business- and corporate-level strategies. Professor Oliver Williamson, University of California, Berkeley, will be the keynote speaker.

Persons who wish to attend the conference must apply by September 15, 1990; participation is limited to 50. Registration fees are \$50 per person. For more information, contact: Professors Srinivasan Balakrishnan or Elaine Mosakowski, Conference Coordinators, Strategic Management Research Center, Carlson School of Management, University of Minnesota, Minneapolis, MN 55455, Phone (612) 624-0226.
