With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Authors

Anitesh Barua ("Incentives and Computing Systems for Team-based Organizations") is Assistant Professor of Information System and an Associate Director of the Center for Information Systems Management at the Graduate School of Business, The University of Texas at Austin. He received his Ph.D. from Carnegie Mellon University in 1991. His research interests include the business value of IT and reengineering, team-based organizations, and electronic commerce. His papers have appeared (or are scheduled to appear) in *Information Systems Research*, *Journal of Organizational Computing*, and *MIS Quarterly*. **Address:** Center for Information Systems Management, Department of MSIS, Graduate School of Business, The University of Texas at Austin, Austin, TX 78712; telephone 512-471-7895; fax: 512-471-0587; e-mail: barua@mail.utexas.edu

Richard Boland ("Perspective Making and Perspective Taking in Communities of Knowing") joined Case Western Reserve University in 1989 after 13 years as Professor of Accounting at the University of Illinois in Urbana-Champaign. He has held visiting positions at Gothenburg University (Sweden), UCLA Graduate School of Management and Oxford University (England). He teaches in the areas of system analysis, philosophy of science and research methods. His research interests include qualitative analysis of the design and use of information systems, and he is particularly interested in organization and human consequences of information technologies. Dr Boland is the Editor-in-Chief of the research journal *Accounting, Management and Information Technologies* (Elsevier Science) and is Co-Editor of *Series in Information Systems* for John Wiley & Sons. He currently serves on the Editorial Boards of *Accounting, Organizations and Society*, *Information Systems Research*, and *Information Systems Journal*. **Address:** Weatherhead School of Management, Case Western Reserve University, 10900 Euclid Avenue, Cleveland, OH 44106-7235; telephone: 216-368-6022; e-mail: boland@spider.cwru.edu

Gerardine DeSanctis ("Electronic Communication and Changing Organizational Forms") is Professor of Management at Duke University. Her research interests are in the general areas of organizational computing, computer-supported cooperative work, and management of information systems. She received her Ph.D. from Texas Tech University in 1982. Before joining the Duke faculty, she was Professor of Information and Decision Sciences at the University of Minnesota. **Address:** The Fuqua School of Business, Duke University, Box 90120, Durham, NC 27708-0120; telephone (919) 660-7848; fax: (919) 681-6245; e-mail: gd@mail.duke.edu.

Masayo Fujimoto ("Shaping Electronic Communication: The Metastructuring of Technology in the Context of Use") is a consultant at The Sumitomo Marine Research Institute, Japan. Her research interests include the use of electronic communication technologies in organizational settings, and the policy issues of organizational and national communication networks. **Address:** The Sumitomo Marine Research Institute, 27-2, Shinkawa 2-Chome, Chuo-Ku, Tokyo 104, Japan; telephone 81-3-3297-4016; fax: 81-3-3552-7576; e-mail: ldd00672@niftyserve.or.jp

Janet Fulk ("Electronic Communication and Changing Organizational Forms") is Associate Professor and Associate Director of the School of Communication at the Annenberg School for Communication, University of Southern Califor-

nia. She earned an M.B.A. and Ph.D. at Ohio State University. Her research focuses on the interplay of communication technology and social systems. **Address:** Annenberg School for Communication, University of Southern California, Los Angeles, CA 90089-0281; telephone: (213) 740-0941; e-mail: FULK@BCF.USC.EDU.

Patricia Fung ("Constructing the Networked Organization: Content and Context in the Development of Electronic Communications") graduated from University of the West of England (UK) in 1984. After studying for an M.Sc. at Sussex University (UK) she undertook her doctoral studies at the Open University (UK) investigating the use of formal semantics in student modeling. She is currently a lecturer in Educational Technology at the Open University, with research interests in the introduction and use of computing technologies and electronic communications in learning environments. **Address:** Institute of Educational Technology, Open University, Walton Hall, Milton Keynes, Buckinghamshire, England.

Pamela Hinds ("Communication across Boundaries: Work, Structure and Use of Communication Technologies in a Large Organization") is a doctoral student in the Department of Social and Decision Sciences at Carnegie Mellon University. Her research interests include the impact of communication technologies in organizations, social perception in communication, and social networks. **Address:** Department of Social and Decision Sciences, Carnegie Mellon University, 5000 Forbes Ave., Pittsburgh, PA 15221-3890; telephone (412) 268-6673; e-mail: ph00@andrew.cmu.edu; fax: (412) 268-6938

Sara Kiesler ("Communication across Boundaries: Work, Structure and Use of Communication Technologies in a Large Organization") is Professor of Social and Decision Sciences at Carnegie Mellon University. She has studied how computer technologies change group dynamics and communication in organizations. In 1991, she and Lee Sproull published *Connections: New Ways of Working in the Networked Organization* (MIT Press), summarizing their research. Current projects include HomeNet—a field study of families on the Internet, a longitudinal study of learning technical teamwork, and experimental studies of human-like computers. **Address:** Department of Social and Decision Sciences, Carnegie Mellon University, Pittsburgh, PA 15213; telephone 412-268-2848; fax: 412-268-6938; e-mail: kiesler@andrew.cmu.edu.

John Leslie King ("Hardwiring Weak Ties: Interorganizational Computer-mediated Communication, Occupational Communities, and Organizational Change") is Professor in information and computer science and management at the University of California, Irvine. His research focuses on the economics and management of information technology in complex organizations. His current research is investigating the problem of requirements analysis for the design of computer-supported systems used in highly institutionalized organizational sectors. He is the Editor-in-Chief of the *INFORMS* journal *Information Systems Research*.

Martin Lea ("Constructing the Networked Organization: Content and Context in the Development of Electronic Communications") received his Ph.D. in 1983 from Lancaster University. He holds a lectureship in psychology at the University of Manchester together with a fellowship from the U.K. joint research council initiative in cognitive science/

human computer interaction. He previously worked as research fellow at the Open University, and has held a postdoctoral fellowship in information technology from the SERC. His main research interest is in the sociology and social psychology of technologically-mediated communication. He recently edited the book *Contexts of Computer-Mediated Communication* (London: Harvester-Wheatsheaf). **Address:** Department of Psychology, University of Manchester, Manchester, M13 9PL England; telephone: +44(0)61 275 2582; fax: +44 161 275 2588; e-mail: lea@fs3.psy.man.ac.uk

C.H. Sophie Lee ("Incentives and Computing Systems for Team-based Organizations") is a doctoral candidate of Information Systems at the Department of Management Science and Information Systems, Graduate School of Business, the University of Texas at Austin. Her research interests include complementarity of technology, incentive, and organizational design, reengineering, mass customization and electronic commerce. Her papers have appeared in proceedings of Conference of Concurrent Engineering and ACM Computer Science Conference. **Address:** Center for Information Systems Management, Department of MSIS, Graduate School of Business, The University of Texas at Austin, Austin, TX 78712; telephone 512-345-3881; fax: 512-471-0587; e-mail: sophie@cism.bus.utexas.edu

Mary Lind ("Improving Interorganizational Effectiveness through Voice Mail Facilitation of Peer-to-Peer Relationships") received the Ph.D. degree in management information systems from the University of North Carolina at Chapel Hill in 1988. Prior to graduate school, she worked for ten years as a systems analyst in the management information systems field. She is currently Associate Professor in the School of Business and Economics at North Carolina A & T State University. Her current research interests are in the areas of computer mediated communication channels, software project management, and the impact of technology on firm performance and service quality. She has published in *Organization Science*, *Management Science*, *IEEE Transactions in Engineering Management*, *Information Systems Research*, *Information and Management*, and *Database*. **Address:** School of Business and Economics, NCA & T State University, E. Market Street, Greensboro, NC 27411.

James L. McKenney ("Social Context and Interaction in Ongoing Computer-supported Management Groups") received a B.S.M.E. and an M.S. from Purdue in 1952, and his Ph.D. in Business Administration from UCLA in 1961. He has taught a variety of courses in the M.B.A. and Executive programs on the topics of production, system analysis, control, and information systems. His research interests focus on managing the implementation and growth of intelligent terminal communication systems, knowledge based systems, and the design and management of private communication systems. His articles have appeared in a number of publications, including *Management Science*, *Journal of Business*, *Annals of the History of Computers*, and the *Harvard Business Review*. His latest book is *Waves of Change: Business Evolution through Information Technology*, Harvard Business School Press, Boston, MA: January 1995. **Address:** Harvard Business School, Baker Library West, Boston, MA 02163.

Kazuo Okamura ("Shaping Electronic Communication: The Metastructuring of Technology in the Context of Use") is a senior researcher at the Matsushita Electric Industrial Company, Japan. His research interests include group communication systems in mobile computing environments, and socio-cultural differences in the usage of communication technologies. **Address:** Matsushita Electric Industrial Co.,

Ltd., 1006, Kadoma, Osaka 571, Japan; telephone 81-6-906-2443; fax: 81-6-906-3954; e-mail: okamura@isl.mei.co.jp.

Wanda J. Orlikowski ("Shaping Electronic Communication: The Metastructuring of Technology in the Context of Use") is the Gordon Y. Billard Career Development Associate Professor of Information Technologies at the Sloan School of Management, Massachusetts Institute of Technology. Her research interests focus on the interaction between information technologies and organizational elements such as structure, culture, communication, social cognition, and work practices. She received her Ph.D. in information systems from New York University. **Address:** Sloan School of Management, MIT (E53-329), Cambridge, MA 02139; telephone (617) 253-0443; fax: (617) 258-7579; e-mail: wanda@mit.edu.

Jeanne Pickering ("Hardwiring Weak Ties: Interorganizational Computer-mediated Communication, Occupational Communities, and Organizational Change") is a research associate in information and computer science at the University of California, Irvine. She is studying software system requirements definition in the interactive game industry.

Ramkrishnam V. Tenkasi ("Perspective Making and Perspective Taking in Communities of Knowing") is Assistant Research Professor with the School of Business Administration, University of Southern California. He received his Ph.D. in Organizational Behavior from Case Western Reserve University in 1994. His research examines learning and sense-making in complex and nonroutine task environments such as new product development and organizational change. Recent publications have appeared in *Organization Science*, *Employee Relations*, and *Advances in Interdisciplinary Study of Work Teams*, Vol. 2. **Address:** School of Business Administration, University of Southern California, Los Angeles, CA 90089-1421; telephone: (213) 740-9814; e-mail: tenkasi@almaak.usc.edu.

Andrew Whinston ("Incentives and Computing Systems for Team-based Organizations") is the Hugh Roy Cullen professor in the Graduate School of Business, The University of Texas at Austin. His research deals with DSS, distributed AI, economics of IS, and electronic commerce. He is the editor of *Decision Support Systems* and the *Journal of Organizational Computing*. He has published over 250 articles in journals including *Management Science*, *Information Systems Research*, *Decision Support Systems*, *Operations Research*, *American Economic Review*, *ACM Transactions on Database Systems*, and *Econometrica*. **Address:** Center for Information Systems Management, Department of MSIS, Graduate School of Business, The University of Texas at Austin, Austin, TX 78712; telephone 512-471-8879; fax: 512-471-0587; e-mail: abw@uts.cc.utexas.edu.

JoAnne Yates ("Shaping Electronic Communications: The Metastructuring of Technology in the Context of Use") is Associate Professor at the Sloan School of Management, Massachusetts Institute of Technology. Her research, which includes both historical and contemporary studies, focuses on understanding how the use of communication and information within firms shapes and is shaped over time by its changing organizational, managerial, and technological contexts. She received her Ph.D. from the University of North Carolina in Chapel Hill. **Address:** Sloan School of Management, MIT (E52-544), Cambridge, MA 02139; telephone: (617) 253-7157; e-mail: jyates@mit.edu.

Michael H. Zack ("Social Context and Interaction in Ongoing Computer-supported Management Groups") is Assistant Professor at Northeastern University's College of Business Administration. He received his doctorate in Business

Administration from the Harvard Business School in 1991. His research interests include the impacts of information technology on organizational behavior and performance, and on the flow of information both within and among organizations. As a research fellow of the Lotus Institute, he has been studying the use of groupware by senior and middle-level management teams. **Address:** College of Business Administration, Northeastern University, Boston, MA 02115; telephone: 617-373-4734; fax: 617-373-3166; e-mail: mzack@nuhub.neu.edu.

Robert Zmud ("Improving Interorganizational Effectiveness through Voice Mail Facilitation of Peer-to-Peer Relationships") is Professor and Thomas L. Williams, Jr. Eminent

Scholar in Management Information Systems in the Information and Management Science Department, College of Business, Florida State University. His current research interests focus on the impact of information technology in facilitating a variety of organizational behaviors and on organizational efforts involved with planning, managing, and diffusing information technology. Dr. Zmud currently is Editor-in-Chief of *MIS Quarterly* and a senior editor with *Organization Science*. **Address:** Information and Management Sciences Department, College of Business, 405 Rovetta Business Building, Florida State University, Tallahassee, FL 32306.
