With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

SUBJECT INDEX—ARTICLES AND LETTERS

A

Accident reductions test, 206-217
 Airlift prediction methodology, 158-166
 Airline
 cost/benefit analysis, 131-157
 flight scheduling, 131-157, 232-248
 short-haul market, 286-294
 system simulation, 131-157
 Airplane markets analysis, 131-157
 Allocation of resources, 251-260, 295-307
 Allocation of servicing periods, 74-80
 Announcements, 52-53, 129-130, 249-250, 365-366
 Appreciation to contributors, 51
 Attractive path generator process, 232-248
 Australian Road Research Conference, 32-46, 128

B

Best-path problem, 295-307
 Binomial arrivals, 24-31, 126-128
 Book review, 47-50
 Books of Interest, 47-50
 By-Laws of Transportation Science Section, 362-364

C

Car-following theory, 95-108
 Circular city road networks, 109-125
 Circular city traffic assignment, 318-361
 Commuter roads, 6-23
 Computerized economic model, 131-157
 Conference,
 Australian Road Research Board, 32-46, 128
 Control for signalized traffic intersection, 1-5
 Costs
 errors in decision, 206-217
 military cargo airlift, 158-166
 airline cost/benefit analysis, 131-157

D

Decision procedures, 206-217
 Delay minimization, 74-80, 81-94

Distribution estimator process, 232-248
 Dynamic programming, 1-5, 251-260

E

Equilibrium behavior, 218-223
 Errata, 128

I

Industrial operations research,
 Airplane markets analysis, 131-157
 Information for contributors, 54
 Intersection width determination, 224-231
 Interstate highway's effect on air travel, 286-294
 Irreversible roads, 6-23

L

Late start; early destination, 308-317
 Letters to the Editor, 51, 126-128

M

Markov chain, 1-5
 Mathematical models, 6-23, 24-31, 224-231
 Military operations research,
 airlift prediction methodology, 158-166
 Models
 airline passenger allocation, 232-248
 allocation of servicing periods, 74-80
 attractive path generator, 232-248
 binomial arrivals, 126-128
 car following, 95-108
 computerized economic, 131-157
 controlled Markov chain, 1-5
 mathematical, 6-23, 24-31, 224-231
 multiple regression, 286-294
 reciprocal spacing, 95-108
 signalized intersection, 1-5
 stochastic, 167-183, 184-205
 traffic assignment, 318-361
 traffic distribution estimator, 232-248
 Multilane traffic flow, 184-205
 Multiple regression model, 286-294

N

Networks
 airlane, 232-248

circular city, 109-125, 318-361
 spiral road, 109-125
 Note, 50

P

Passenger allocation process, 232-248
 Passenger short-haul demand, 286-294
 Peak short-time traffic flows, 167-205
 Pedestrian crossing time, 224-231

Q

Queuing

binomial process, 24-31
 Markov chain, 1-5
 negative-exponential services, 218-223
 steady-state quantities, 167-205
 transport service processes, 218-223

R

Reciprocal-spacing model, 95-108
 Reversible roads, 6-23
 Ring roads, 6-23, 109-125
 Road research conference, 32-46, 128

S

Satellite towns' commuter traffic, 6-23
 Scheduling,
 airline flight, 131-157, 232-248
 Servicing-periods allocation, 74-80
 Signal synchronization
 minimum delay, 81-94
 one-way street, 55-73
 Signalized intersections
 control, 1-5
 delay, 24-31, 126-128
 diffusion process, 81-94
 pedestrian crossing time, 224-231
 Simulation, 131-157, 167-183
 Spiral road networks, 109-125
 Stationary processes, 167-183

Steady-state quantities, 167-205
 Stochastic processes, 167-183, 184-205
 Summer traffic courses, 52, 356
 Supersonic transport, 131-157
 Symposiums
 Theory of Traffic Flow, Third International, 48-50
 Fourth International, 51, 129

T

Theory of traffic flow
 summer courses, 52
 symposiums, 48-50, 51, 129
 Time-shared traffic streams, 74-80
 Traffic
 assignment on circular city, 318-361
 commuter, 6-23
 delay, 24-31, 74-80, 81-94, 126-128
 distribution estimator process, 232-248
 multilane flow, 184-205
 peak short-time flows, 167-183
 pedestrian, 224-231
 satellite towns, 6-23
 signal synchronization, 55-73, 81-94
 signalized intersection delay, 24-31, 126-128
 signalized intersection model, 1-5
 summer courses, 52, 356
 symposiums, 48-50, 51, 129
 Transport improvement problem, 295-307
 Transport service process, 218-223
 Transportation Science Section By-Laws, 295-307
 Travel patterns, 261-287
 Travel time minimized, 261-287

U

Urban travel behavior, 261-285
 Utility theory, 206-217
