With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

INFORMATION FOR CONTRIBUTORS

Manuscripts for publication and Letters to the Editor should be submitted to the Editor either directly or to one of the Associate Editors. The submission of a manuscript is taken to be the author's representation that the manuscript has not been published or accepted for publication in books or recognized journals and is not currently under consideration by another journal.

Manuscripts must be double-spaced throughout with the original in typewritten or equally legible form. Complete and legible duplicate and triplicate copies are necessary to accelerate the process of refereeing and are strongly recommended. The style of this journal should be followed in the preparation of manuscripts.

Figures are required in a form suitable for photographic reproduction. Any one of a number of forms will be acceptable, e.g., original black ink drawings, or high-quality glossy prints. Lettering should be uniform in size and style and sufficiently large to be legible after reduction. Figures should be designated by arabic numbers and referred to in the text by number. Figure legends should be collectively provided on a separate sheet rather than placed on the figures themselves.

Tables may be typed on sheets separated from the text. Each table should have a caption that makes the table entries clearly independent of the text; complicated column headings should be avoided. All tables should be numbered and referred to in the text by number.

In mathematical expressions, authors are requested in general to minimize unusual or expensive typographical requirements; for example: authors are requested to use the solidus wherever possible in preference to built-up fractions, to write complicated exponentials in the form $\exp(\square)$ and to avoid subscripts or superscripts on subscripts or superscripts. Subscripts and superscripts should be shown large and clear, Greek letters and unusual symbols should be labeled on first occurrence, as should subscript "zero", to distinguish it from the letter "oh". Whether each letter is capital or lower case should be unambiguous. Equation numbers must be at the right.

Each paper must be accompanied by an abstract of about 100 to 200 words. The abstract should be adequate as an index and should summarize the principal results and conclusions.

Authors should strive for conciseness and clarity. References to related previous work should be reasonably complete, consecutively numbered, and grouped at the end of the paper.

Manuscripts will be considered for publication in this journal when copy conforming to the above instructions is furnished.
