With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

INFORMATION ON ORSA MEMBERSHIP

Any person interested in Operations Research may become an *Associate Member* by submitting an application accompanied by appropriate dues. Students working for a degree in a recognized college at least half-time and enlisted personnel of the Armed Forces of the U.S.A. may apply for *Student Associate Membership*. Applicants for admission as full *Members* will initially be granted *Associate Membership* pending consideration of their election to full *Membership*, unless otherwise requested. All members receive OPERATIONS RESEARCH, the Journal of the Society, and, in addition, OR/MS TODAY. Subscriptions are available at reduced rates to TRANSPORTATION SCIENCE, IAOR, and a number of other journals.

For election to full *Membership* an applicant must supply pertinent information for the Membership Committee and receive the favorable votes of the majority of that Committee prior to a final vote by the Council, which is normally taken only twice a year. An applicant for election as full *Member* and his references may receive requests for further information from the Chairman of the Membership Committee. Normally two full *Members* of ORSA are required as references of eligibility.

The following criteria of eligibility are offered as a guide to potential *Members*:

- (a) Experience of at least two years demonstrating ability to do effective and original professional work in operations research or,
- (b) Experience of at least two years in a field closely related to operations research, provided there is evidence of interest in operations research problems, and evidence of ability to do effective and original professional work on these problems, or
- (c) Management responsibility for activities embracing operations research; in such case, the individual should hold such position by virtue of technical qualification, or
- (d) Academic appointment, with responsibility for operations research or related courses, for at least two years, or
- (e) Substantive open publications on operations research.

Annual dues are \$15.00 for *Members* and *Associate Members*, \$8.50 for *Student Associate Members* and \$13.50 for *Members* and *Associate Members* residing outside the U.S. and Canada. Half year dues (after July 1) are 50% of the annual dues but entitle the member to only the publications for the last half of the year.

Requests for membership information and applications as well as subscriptions to Society publications should be addressed to:

Operations Research Society of America
428 East Preston Street Baltimore, Maryland 21202
