“OPERATIONS RESEARCH AT BELL LABORATORIES THROUGH THE 1970s,”
by DAWSON, McCALLUM, MURPHY, and WOLMAN

Part I - March-April 2000

ABSTRACT

1. ORGANIZATIONAL HISTORY

- 1.1 Origins of Operations Research
- 1.2 Early Uses of Quantitative Methods
- 1.3 Recognition of Operations Research
- 1.4 Establishment of Business Operations Analysis
in the Bell System
- 1.5 Operations Research at Bell Labs
- 1.6 Evolution of the Operations Research Center
within Bell Labs

2. APPLICATION OF OPERATIONS RESEARCH TO BELL SYSTEM PROBLEMS

- 2.1 Teletraffic Theory and Engineering
 - 2.1.1 Traffic Variability
 - 2.1.2 Network Management
 - 2.1.3 Research on Congestion Systems
 - 2.1.4 Traffic Network Design
 - 2.1.5 Leadership of Traffic Work

Part II - May-June 2000

- 2.2 Capacity Expansion in Telephone Networks
- 2.3 Operations Analysis
 - 2.3.1 Coin Collection
 - 2.3.2 Inventory Management for Station Products
 - 2.3.3 Directory Marketing Analysis
 - 2.3.4 Workforce Scheduling
 - 2.3.5 Other Activities and Supporting Research

Part III - July-August 2000

2.4 Applied Statistics

2.4.1 Forecasting

2.4.2 Measurement and Index Construction

2.4.3 Sample Surveys for Engineering
and Cost Analysis

2.4.4 Engineering Design and Human Factors

2.4.5 Human Resources Management

2.4.6 Software for Special and General Applications

2.4.7 Applied Research in Statistics

2.5 Related Operations Research Activities

2.5.1 Data Management for Operations

2.5.2 Economics Modeling

2.5.3 Examples of Analytical Support
and Corporate Planning in AT&T

3. SUMMARY
