

11:14:16 From Ananth Raman:

How did the company provide this service to SMEs in the 1980s? There was no AWS then, even the internet did not exist

11:16:07 From Jérémie Gallien:

Good question Ananth... infrastructure for ERP systems seems to have really evolved a lot since the era of closed computer networks.

11:19:03 From Ananth Raman:

Do you identify "rules" and KPIs specific to an industry? For example, KPIs/rules for retailer could be quite different than a media company.

11:35:04 From Ananth Raman:

Looks like Assaf is arguing for simple (understandable and implementable) algorithms. Tradeoff performance with simplicity.

11:37:18 From Ananth Raman:

At some of these SMEs there could be transactions (purchase, sales, payments, etc.) that are not entered in the ERP system. That is, "off the books" transactions. Do such transactions exist and how does that complicate the ERP?

11:43:04 From Ananth Raman:

Is Wizsoft disrupting the ERP industry or the consulting industry? SMEs do not have SAP and do not have Accenture.

12:00:43 From Debdatta Sinha Roy:

Thank you Assaf!!! Need to drop for another meeting.

12:01:12 From Stefanus Jasin:

Thanks Assaf!! :)

12:01:21 From Assaf Avrahami:

Thank you all :) looking forward for our cooperation
