

## TRANSPARENCY SUBMISSION CHECKLIST Effective March 12, 2025

**Title of Manuscript:**

In submitting a manuscript to *Organization Science*, you are acknowledging that you have read and confirm the following statements and will comply with the journal's **Data and Methods Transparency Policy**, [which can be found here](#).

My paper contains no code or data (STOP HERE).

### **Data Use and Ethics** (please check all that apply to this submission)

I confirm that I have read and will comply with *Organization Science's* data and methods transparency policy and guidelines, including those pertaining to code and data sharing.

If you cannot fully or publicly share all data in the paper, please detail why and suggest an alternative approach consistent with the spirit of transparency:

I confirm that our author team has legitimate and legal access to the data. The journal cannot allow review or publication of papers that use data that was "originally" obtained in an illegal manner (e.g., stolen or hacked) without prior written approval from the editor-in-chief.

If you wish to highlight potential data ethics issues pertaining to the collection or use of the data, please explain in the box below:

## TRANSPARENCY CHECKLIST

### Please affirm all statements

My paper details the origins, statistical distributions, and other characteristics of any quantitative data used in the paper as much as is legally and ethically possible.

My paper provides detailed descriptions of the research methods used, including sample selection, exclusions, specification choice, model assumptions, sample and subsample sizes, and measurement construction.

My paper accurately presents the magnitude and precision of any estimated effect sizes.

My paper accurately represents any causal inference, including the use of causal (e.g., “affects”) or correlational (“is associated with”) language.

My paper presents all conditions used in any experiments.

My paper accurately represents and links any pre-registration associated with its studies, including deviations from the registered protocol or unexpected results.

My paper accurately represents the chronological sequence through which all theory and empirics were produced, regardless of how they are organized within the paper.

I have detailed any use of artificial intelligence in the writing or analysis of the paper.

My paper presents any institutional review board (IRB) or other ethical considerations in the collection, analysis, or presentation of data.

My paper properly references and attributes relevant contemporaneous and prior work using common data or code.
