

OPERATIONS RESEARCH

Amy R. Ward , Editor-in-Chief | The University of Chicago, Booth School of Business

Operations Research, as the flagship journal of the profession, is committed to publishing papers that advance the state-of-the-art knowledge in the field of Operations Research; that is, in how to use analytical methods to improve decision-making. The journal's mission is to be the leading platform for innovative and impactful research in the field of Operations Research.

This bimonthly journal serves the entire operations research community including practitioners, researchers, educators, and students. In that respect, the papers that appear in the journal must satisfy three essential requirements: operations-focused, scientific, and broad. Research articles include those concerning the definition of new problem domains for the field, innovative conceptualizations and mathematical formulations of problems, and the development of new methodologies to attack known and new problems.

"*Business Week* continues to include four INFORMS journals (*Marketing Science*, *Operations Research*, *Management Science*, and *Information Systems Research*) among the top 20 journals valued by business school deans and academic program directors."

Frequency: 6 issues/year (bimonthly) | ISSN: 0030-364X (Print) | eISSN: 1526-5463 (Online) | First Issue: 1953
