

SERVICE SCIENCE

Guillaume Roels, Editor-in-Chief | INSEAD

Service Science is an INFORMS academic journal that publishes innovative and original papers on all topics related to service, including work that crosses traditional disciplinary boundaries.

It is the primary forum for presenting new theories and new empirical results in the emerging, interdisciplinary science of service, incorporating research, education, and practice. It documents empirical, modeling, and theoretical studies of complex service systems.

Articles published in *Service Science* rely on approaches from a broad range of disciplines, including operations, engineering, marketing, design, and more, and often take a broad perspective by folding multiple methods and theories together and elaborating practical managerial implications.

As a fully refereed, online journal, *Service Science* aims for fast-track publication. Its target audience includes academics and practitioners from all areas of service research, education, and practice.

Frequency: 4 issues/year (quarterly) | eISSN: 2164-3970 (Online) | First Issue: 2009
